Investigations into vertical travel time of the front of buoyant fire plumes
............................................Takashi FUJITA, Jun-ichi YAMAGUCHI, Takeyoshi TANAKA and Takao WAKAMATSU

Numerical calculation of acoustic radiation from diverse vibrating source
..........................................................Norihisa HASHIMOTO, Mitsuo KATSURA and Yoshio NISHIKAWA

Actual sightlines of left and right eyes to task on desk and binocular visibility. Study on evaluation method of visibility taken binocular condition into consideration part 1
.........................................................Yoko INOUKE and Katsuzo ITOH

A calculation method for thermal transmittance of insulated doors
.........................................................Hiroshi AKASAKA, Kiyoito ITAMI and Hideyo NIMIYA

A study on the air distribution and thermal performance of ventilated air layer in the air circulation wall by using outside thermal insulation system
..........................................................Osamu ISHIHARA, Kouji SAKAI, Misako TAJIMA and Kiyomi KAMIMORI

Evaluation of ventilation system performance by age of air using a test house
..........................................................Hiroshi YOSHINO, Hitoshi KOBAYASHI, Satoko HAYASE and Ryosuke TANON

Study on effect of heat load characteristics on the accuracy of heat prediction system with a three-layered neural network model
..........................................................Masaki SHIOYA, Noriyasu SAGARA and Hitoshi TAKEDA

Comparison of the change in urban development in the kitayuusuki urban area and the ema area in germancy
..........................................................Bart DEWANECER

Analysis of relationship between form and materials of urban blocks in housing estate and sensible heat flux from the total surfaces
..........................................................Akira HOYANO, Akinao INO, Motoharu ONO and Shin TANGUCHI

The regression analysis to the case of multiple responses for the thermal sensation votes Statistical analysis of categorical data
..........................................................Masako NABESIMA and Kazuo EMURA

Expecting harmony of townscape based on mechanism of appraisal
..........................................................Yoichi OYAMA, Masakazu NISHIMURA, Kazumi NAKAYAMA and Masato SATO

A discussion on relationship between cvd mortality and environmental temperature
..........................................................Shin-ichi YAMANAKA and Yasuo NAKAMURA

Utilization of common space in rumah susun sambo (surabaya, Indonesia)
..........................................................Naohiko YAMAMOTO, Mari TANAKA, Yoshinori WAKITA and Shuji FUNO

The building conditions of small scale workshops for disabled persons and their estimations
..........................................................Tadashi YAMAMOTO and Ryuji TAJIMA

Characteristics of life and space utilization in group living
..........................................................Satoshi ISHI, Tadashi TOYAMA and Yoshio NAGASAWA

A study on the relationship between exhibit order and visitor's recognition
..........................................................Hiroshi ISHIKAWA and Kazumichi OHARA

A consideration on cultural factor of environment
Study on poetic imagery of environment part l
..........................................................Kiyoe TAKAGI, Fumiaki SEKIO and Naoto MATSUMOTO

A study on changes of the basic structure of traditional spatial village and community (munjuning)
..........................................................Young-ki LEE

Investigation and analysis concerning the actual conditions of residential system building use composition
..........................................................Atsuhiko HIROYA, Hirofumi IJIMA and Yoshinichi TSUBOI

On the change of inhabitants' behavior and consciousness in tsukuba new town
..........................................................Takashi DOH, Kayo PUKUMOTO, Junji SAKAMOTO and Kazumune TANAKA

Structure of evaluation on color in cityscape
..........................................................Michihiro KITA, Yoshinobu OKU, Kunio FUNAHASHI and Keijin KAMINO

A study on quantitative description method of sequential street landscape
Development of the method that describes attributes of street landscape by using the fluctuation and verification of its usefulness
..........................................................Kenta HAYAMI and Haruhiko GOTO

A study on the sequence of landscape with pedestrian action and response
..........................................................Ryo MASUKO and Hiroshi ZAINO

Formation of the spatial domain and the image of mass by the solid composition of city blocks
..........................................................Naoami ANDO, Koji YAGI and Yoko TAGUCHI

The present situation and problems on the tactile warning blocks from the view point of constructors and users
..........................................................Naoto TANAKA and Michiko IWATA

Decision making process of building detail design during construction term

A study on the state of maintenance and the awareness to maintenance on exterior spaces of the multiple housing
..........................................................Katsuyoshi MINEMASA, Kenji ITO and Shuzo FURUSAKA

A study on the state of maintenance in public space part l
..........................................................Yoko SONE and Hiroshi FUTAGAMI

Houses made building lots
Houses on the river in front of seigamig temple in kamigyo district of kyoto in sengoku and oda-toyotomi era
..........................................................Toshikazu TSUCHIMOTO

The actual condition of waqf among exsistent wakala-s in cairo and the historical significance in the construction of wakala-s
..........................................................Yukimasa YAMADA

The twofold meaning of the court
An inquiry into kahn's houses through analysis of the process of form modification
..........................................................Tadanao MAEDA
