Numerical simulation of an impulse response for room acoustic design 

Study on a method to make a reverberation part for synthetic sound field by using oss 

Study on practical improving of new sound tube measuring method for sound propagation constant 

Effect of resonant vibration of test porous material and application measurements 

An experimental study on the effect of thermal insulation on fermentation process in residential composting tanks 

Study on modified k-e model applicable to stable and unstable flows due to buoyancy 

Emission characteristics of nitrogen oxides from flowless type kerosene space heaters (part 1) 

Natural radioactivity concentrations in building materials 

Performance prediction of an ambient-energy heat pump based on sol-air temperature 

Evaluation of psychological and physiological stress of elderly workers engaging in building maintenance services 

A study of daylight with sunbeam in atria 

Analysis of the factor prescribed the behavior in dwelling life on intellectual disabled person 

A study of classroom units at the national kurikuma school for handicapped children 

A case study on aspects of inpatient's life from literary writings 

A study on sheltered care settings in hospice and palliative care unit 

Regional characteristic of "the inner open-space" 

A fundamental study on opening the public facilities 

A study on architectural planning of an elementary school from the viewpoint of children's daily activities and studies 

A study on the method of estimating the total floor area and volume of public facilities for the modern performing arts 

A study on the planning of capacity and size of public facilities for the modern performing arts 

Application of a test to have subjects identify photographed scenes to evaluate their spatial abilities 

Analysis of the interior space in hospitals by puzzle-map method 

Extension of spatial allocation language and algorithm for finding sal notation from geometric information of plan 

Water control system and principle on the chikugo river basin 

Ritual facilities and community organization of cakranegra city, Lombok, Indonesia 

A study on the 1936 plan for boulevards network in sapporo 

A study on estimation and transition of the streetscape by means of a virtual reality simulation system 

Substantial analysis of "doki-shi" on mainstay books in the architectural reference books of shitemonji school 

A study on the trade of housing sits and the block patterns in a local city of edo period 

The transformation of back lots and the reorganization of block patterns in old osu town 

"The committee of tourist industry" and urban facilities 

On the study of the 'japanese' elements in the historical context from the analysis of the two japanese buildings at the centennial exhibition in 1876 

Kyoto's role in the formation of the ancient shrines and temples preservation act 

Famous muqarnas in the fourteenth century 

Study on the original form of the first boat of king khufu 

B. ammannati's project of s. giovannino dei fiorentini and collegio relative to plans of churches and religious houses 

A study for space-meaning on the using columns in villa savoye of le corbusier 

A study of visitors' perception on the marina and the water front area in the urban area 

ARCHITECTURAL INSTITUTE OF JAPAN
