JOURNAL OF ARCHITECTURE, PLANNING AND ENVIRONMENTAL ENGINEERING (Transactions of AIJ)

April 2000 Number 530

Effect of control of interior lighting on estimation of satisfaction
Naoki MIYASAWA, Yoshikazu NAKAMURA and Shinzou KOBAYASHI 1

Thermal analysis of a reinforced-concrete building under intermittent heating based on the lumped constant system
Hidetoshi KUBOTA, Norihiko KAMATA and Hirota SUZUKI 13

The hygrothermal environment in the crawl space insulated on foundation wall in the summer involving rainy season
Study on vertical edge insulation method for the moderate and humid climate region
results from part 2
Yoshihito HONMA, Hirota SUZUKI and Yuzo SAKAMOTO 26

Experimental estimation of natural convective heat transfer coefficients for the human body and its segments
Tetsuro HARA, Takeji YOROI and Shinzou KATO 31

Study on thermal plumes in free space by means of numerical simulation based on standard k-e model
Yutaka FUNAOKA, Masashi YAMAMOTO and Shinsho KAWAMURA 33

Evaluation of aerodynamic performance for parallel and opposed blast dampers and visualization of air flow in a duct
Yukihide HASHIMOTO, Shigeru YAGI and Nobuyuki TOSAKA 47

Consideration on the performance evaluation methods for air cleaners based on field measurements
in children's houses
Mika SHIGETSU, Tatsuo HIROSE, Shinichi TSUCHIYAMA and Koichi IKEDA 53

Effects of bake out as a source control technique for indoor chemical substances
(1) A study on indoor air pollution by voc and formaldehyde
Atsuo NOZAKI, Kaoru IKURA, Susumu YOSHIZAWA, Masahiro INOUE and Masahiro HIRAYAMA 61

Theoretical study on adsorption mechanisms of gaseous matter from cleanroom air onto silicon wafer surfaces
Naoki KAGI and Shoji FUJII 67

Study on urban thermal environment evaluation by using land use map
—Case-study in the 50km's area of metropolis
—Hofeng LI, Weimin WANG and Qingsong YIN 73

Experimental study on pavement system with special waterproof surface
Hiroyasu TAKAMURA and Hirotsugu KAWAMURA 79

Fundamental survey on improving occupational environments in the rapidly aging society
—Hisa NOGUCHI, Sungyoung LEE and Akiko SASAKI 87

Comprehensive research on sustainable building policy of OECD member countries and its application
Shoichi ANDO 95

The transfer of managing roles from parent to child in urban multiple generation living and flexibility of dwelling spaces
Hiroshi AIZAWA, Noriko SAIO and Megumi TARAI 103

Spatial composition of the muya tibetan house
—A study on spatial composition of settlements and dwellings of the old qiang tribes
—Measurement of pressure
—Eriko INOUE 111

Level of school-community complex in function of public elementary and junior high school and factors for planning
—With viewpoints of "co-sharing of space" and "fusion of activities" between school and dwelling community
—Naoko SAIO, Hiroshi AIZAWA and Shinichi TSUCHIYAMA 119

Needs of lifelong learning activities and opportunities provided by community facilities in dwelling area
—Naoko SAIO, Hiroshi AIZAWA, Kiyoko KAWASAKI and Atsuko TOJO 127

Architectural composition of exterior elements in collective housing
—Collective form in contemporary Japanese houses
—Takahiro OHNO 137

A comparative study on housing improvement and repair work by residents experienced and inexperienced
—A study on housing improvement and repair work by residents
—Takahiro OHNO 143

A study on a frame work to examine building systems of disassembly and repair works for preservation from the point of view of building members
—Toshiyuki KONISHI 149

Individual development of child's spatial cognition in a house
—Change of representation after two years
—Shoichi NOJIMA, Yoko HAGIWARA and Kazufumi KITAGAWA 157

The relationship between spatial information and cognitive distance
—Fundamental study for the spatial planning of large-scale architecture based on a distance
—Ryota YANASE and Ichiro SOMA 163

The basic experiment on relation between a perception of volume, spatial impression and the space occupied in the room
—Masayoshi HASHIMOTO and Kazuhiko NISHIDE 171

Quantitative analysis of medical/nursing operating area based on simulation and experience
—Research on planning of intensive-treatment unit in general hospitals
—Takahiro OHNO 179

A study on the public use system of street space in europe and the united states
—A case study of the control on sidewalk cafes in six cities
—Koji KATO, Tadashi WATANABE, Tomohiko IZAWA and Toshio KITAHARA 185

A study on developmental characteristic of small rental shops and incubation function of urban block
—Shoichi NOJIMA and Shingo TAMASHI 193

A study on the shitenno-ji school in sendai-han
—Yusuke NAGAI and Kouichi IBUCHI 201

The significance of the establishment of tutumikado-karasuma-dono
—Isao HIRAYAMA 209

The arrangement of samurai house in castle town ueda and analysis of plan through historical materials
—Takashi HIRAYAMA 215

The state of samurai house in the castle town ueda at the end of edo period (part 1)
—Nobuko ASANO and Kiyoji HIRAI 215

Osaka kurayashiki of saga feudal clan, hizen country
Kyujo UMEYAMA, Takehiko YAMAMOTO and Kazuki TAMAI 221

Upon the first project for the second campaign of versailles under louis XIV
—Takashi NAKASHIMA 229

A study on gourmet shipper's view of polychorey
—Masato KAWAMUKAI 235

The historical legitimacy of "stile lombardo" in italian medievalism
—Yoshio YOKOTE 243

The analysis about the plane form and the belief form of the corridor at the shrine architecture
—Takashi MINEGISHI 249

A study on thalasso-therapeutic facility : An experiment on psychological and physiological effects floating on the salt water pool
—Aki YONEDA, Motoryuki YAZAKI, Hidori TINO, and Kenji HOTTA 257

On constituent factors of database system for graduation study in industrial design course
—Yasuo SHIMOMURA and Tatsumi TERAI 263

Discussion on research activity published as "on regulations pertaining to the protection measures :
—Study on the restoration of old quarters by the safeguarded sector in france—part 3
—Takahiro OHNO 269

The author's answer to the discussion by takasi suzuki
—Yukinobu WADA 271
