JOURNAL OF ARCHITECTURE, PLANNING AND ENVIRONMENTAL ENGINEERING (Transactions of AJI)

September 2001 Number 547

Effect of the tone quality variations of received sound in multi-loudspeaker systems on speech understanding

Study of directional reflection of solar radiation Part 1 measurement of reflected solar radiation using a radiant energy thermometer

Measurement of projected area factors for thermal radiation analysis on each part of the human body Part 3 in the case of young females at sedentary posture

The influence of clothing fit on the effective radiation areas and configuration factors of the human body

Thermal behavior in a cooling tube system with natural ventilation

Performance evaluation of ventilation system of existing houses by ventilation effectiveness

Wind-induced ventilation of void in high-rise apartment building with bellport

Numerical simulation of turbulent buoyant plume based on dsm

Cld analysis on inhaled air region within a calm airflow

Interactive simulation of room temperature and air temperature/emission of radiant heat with room moisture effect of water vapor on temperature distribution in rooms

Behavior of volatile organic compounds and estimation of emission sources in a newly constructed house

A research on the restoration method of the covered river

Characteristic of preference for the view from buildings fronting a rapid based on photographs taken by inhabitants

The characteristics life style and way of living for the elderly and the aged people Designing dwellings to support and enrich longevity lives part 1

A study on the relationship between the elderly's social life and participation in community work

Architectural composition of extended buildings by arrangement and connection of patios

Relationship between total evaluation of townscape, element's evaluation, element's attention level and element's area rate on sidewalks

The characteristic analysis and spatial typology of urban court-houses A study on spatial composition

Expanded model describing a sense of direction produced by an object

Thought experiments on generation of the action regarded as intentional

Dwelling systems in the tonami plain through a comparative study of three different types of villages

A spatial analysis of dwelling system in the tonami plain part 5

An empirical study on going-out activities of the elderly in kumamoto city

A study on the gender difference from the view of strategy of space recognition

Comparison of national acts on treating land contamination in Japan, the Netherlands, Germany, and the united kingdom

Development of a gis-based city planning support system for congested areas of wooden houses

A study for disaster response facilities by frequent communication in a preservation district for groups of historic buildings

Urban forming process in modern silk raising area Action of the wealthy people and space changing process with modernization in honjo-machi

Study on estimate formulae of maintenance cost and evaluation method of renewal period on air conditioning system in office building

The application forms for building up in yamashina villages of iji country The building regulation in agricultural district of yamashiro province through the edo period

A study on the hirayoke found in the architecture of the tea industry in shizuoka prefecture

Design technique of the kiwari of the "mizen kau-jin shen type" in the "gong cheng zao zhe lie" part 2

The formation and changes of the town-houses with arcade in d-hwa street taipei city

Requests of the french court to bernini's design for the louvre palace Bernini's design for the louvre palace considered through the "journal du voyage du cavalier bernini en france" part II

The urban renewal in milan and c. boito's medievalism

A study on ups-and-downs prospect of a academic society based on complexity model Looking for our own way for paradigm transformation really challenging and honest structure for aij university society
