Model experiments on vibration propagation characteristics in the rc building. Comparisons with some results of driving experiments in the real structure and that of the model structure. 1

Estimation of solar declination, equation of time, and sun-earth distance .......................... Tadahiko NAGATA and Takahito FUJINO 2

Calculation methods of radiative heat transfer coefficient for divided airspaces .......................... Hiroshi AKASAKA 3

Convective heat transfer coefficients and clothing insulations for parts of the clothed human body .......................... Masayuki OGURO, Edward ARENS, Richard de DEAR, Zhai ZHANG and Tadahisa KATAYAMA 4

Convective heat transfer coefficients and clothing insulations for parts of the clothed human body under calm conditions .......................... Masayuki OGURO, Edward ARENS, Richard de DEAR, Zhai ZHANG and Tadahisa KATAYAMA 5

Study on the assessment methods and criteria relating to the wind environment on nihonbashi city .......................... Shoichi ARAKAYASHI, Jun SAKAMICHI, Kunto HUJI, Yoshitake TOMINAGA and Hiroshi NAKAJIMA 6

Verification and streamtube analysis of simulated result of airflow of a cross-ventilated building for normal wind angle case .......................... Yusuke NAKAJIMA, Akihiko KOYAMA, Yuki KOBAYASHI, Takahiro SHIBAYA 7

CFD studies on ventilation efficiency in a multi storied underground car park .......................... Hajime YOSHINO, Yasushi KONDO and Yuto TADOKORO 8

Indoor air pollution by microbial volatile organic compounds in indoor environment of fume emissions from fungi in materials .......................... Jun-seok PARK and Koichi IKEDA 9

The investigation of the direct water service system raised the pressure by the pumps at the multiple dwelling houses .......................... Yusuharu ASANO, Taisaku NAKANO, Noriyoshi ICHIKAWA and Suzumu TAKACHIH 10

Study on the method of analytic urban models for use of solar radiation .......................... Yasuaki NAKAJIMA, Daisuke KOMIYA, Kenji KIMURA and Masayuki CHIBA 11

Extraction of land covering changes by landsat tm data .......................... Iwao SAKAI, Ryohei IIDA and Osamu ISHIHARA 12

The influence on life cycle material usage and co2 emission from countermeasure of long-life building .......................... Noboru URUSHIHIKARI, Minoru MIYAZAKI, Masahiro SHIMOMURA and Kenji SAKAI 13

Fundamental investigation on guidelines for regional and architectural planning with climatic characteristics taken into account. Through climatic analyses on hillside area around cities. .......................... Naotake NAKASHI, Minoru MIYAZAKI and Yoshio SHIMODA 14

Analysis on the influence of evaluation about external space to evaluation of residential structure of amenity by inhabitant Case study of the housing development in itabashi city (part 1) .......................... Kitaro SAITO and Hiroki KOSE 15

Empirical analysis on characteristics of policy instruments for improving the energy efficiency of new buildings .......................... Takahiko HASEGAWA 16

Architectural planning of children's hospital wards from a point of view of play environment as assessed by children .......................... Ayako NAKA, Mitsuyo SENDA, Yosuke TSUJI and Tatsuro YATA 17

Development of children's activities and utilization of places A study on architectural planning of "free schools" part 1 .......................... Naotake KAKINO, Masayuki SUDA, Masahiro HATSUMI and Yasushi NAGASAWA 18

A study on the openness of governmental buildings to the public and their planning process .......................... Masayuki YAMAMOTO and Naotake OHKAGI 19

Interactions among residents and care workers .......................... Workers' care in group care unit facility for the elderly .......................... Shigeaki MITSUBARA, Ken AIKAWA, Chikako UENO, Kenji FUNAHASHI and Keiko KNUDSEN 20

Sectional composition of japanese contemporary houses located on the inclined ground A study on spatial composition of relation between architecture and environment .......................... Koichi ENDO, Kazumasa SAKAMOTO and Miliko TERASHI 21

Study on meanings of environmental review with disclosure for architectural planning through the analysis of cultural decisions of cultural quality act .......................... Seiki TAGAWA, Jiro MAJIMA and Takahiro NOGUCHI 22

Research on the adaptation process of rc construction methods in japan and taiwan .......................... Yachien LIN, Shinki MATSUMURA and Tomo INOUE 23

A study on causes of failure in the bijkimme housing project in amsterdam .......................... Yutaka KUSHIHASHI and Yoshimoto SHIOZAKI 24

The present situation of enhancement in important preservation district for groups of historic buildings .......................... Tetsuya KAJIYAMA, Keiko AIKAWA, Misao HIGASHI and Kenji UENO 25

Planning model of the planning of master plan for urban husbandry .......................... Shin AIBA and Shigeru SATOH 26

A study on basic model of long-term building repair plan .......................... Ayako KIKUCHI, Koichi ISHIKAWA and Takashi OMI 27

The building regulation by kyoto machibugyoshou in hourekki-meiiwa era The building regulation in agricultural district of yamashiro province through the edo period (part 1) .......................... Tsutomu NAGAMURA 28

Hachio-goten, former nan-en-ochaya, of hagi during edo-era .......................... Satoru OKADA 29

The application forms for building up to kyoto daikansho in the first half edo period .......................... Tsutomu NAGAMURA 30

The drawing "higo-kumamoto-oyakuzu" in mouroire-bunko A study on kumamoto castle in the kato family's days (part 3) .......................... Tsutomu NAGANUMA and Takashi KITANO 31

A study on the history of kitchen in courtyard house Form end of ming until end of qing period (part 1) .......................... Motoki TORIYAMA 32

The history of natural object collection space in early modern italy Through the analysis of the inventory (1620) of pisa gallery .......................... Koji KAWAKI 33

The process of acquisition of residences in edo by the tokugawa shogunate retainers who came from kishu-kan .......................... Kaoru IWAMOTO 34
