JOURNAL OF ENVIRONMENTAL ENGINEERING (Transactions of AIJ)

June 2003 Number 568

Intensity of material consumption based on 1995 input/output table Application of input/output analysis to building (part 10) Keizo YOKOYAMA, Noriyoshi YOKOO and Tatsuo OKA 1

A transient burning model for charring material and its application to compartment fire Keisuke HIMOTO and Takeyoshi TANAKA 9

Evaluation of brightness of a space considering arrival direction of light Keisuke HIMOTO, Toshihisa ONDA and Takeyoshi TANAKA 17

Aptitudes of night-time street lighting that considers house-street relevance A study related to the low illuminance of street lighting with incorporated natural surveillance part 1 Shigeo KOYAMOTO, Kiwamu MAKI and Masao INUI 25

Subjective experiments on productivity under moderately hot environment Naoe NISHIURA and Shin-ichi TANABE 33

Drawback of dynamic gas model and application of hybrid model Large eddy simulations of turbulent flow over complex terrain (part 1) Satoru IZUKA and Hiroaki KONDO 41

Study on the evaluation method of a cross ventilated building performance Shin-ichi AKABASHI, Yoshitaka SASAKI, Jun SAKAGUCHI and Yoshihito TOMINAGA 49

Effects of bake out as a source control technique for indoor chemical substances (part 3) A study on indoor air pollutants by voc and formaldehyde (part 4) Kazuo IKURA, Fuyuki NOZAKI, Kazuaki BOGAKI and Susumu YOSHIZAWA 57

Control of macro-cell corrosion current through insulating coupling Hiroshi NAKAJIMA 63

Transport performance of drainage systems with food waste grinder for business use Kouichi SHINMURA, Masayuki OTSU, Toru IIDA and Kazuaki IJIMA 71

Evaluation on preferred color temperatures combined with room air temperatures from psychological and physiological responses Part 3 seasonal change in preferred color temperatures at 1,500lux for women aged in 30's and 40's Naoshi KAKITSUBA, Keiko MURO and Tetsumi HORIZIKOSHI 77

A study on reducing the environmental load of district heating and cooling using a large thermal storage tank Examination based on the measurement after completion Masashi MOMOTA, Takeshi INOUE, Tadahiko IBAMOTO, Ryuji YANAGIHARA and Akira OKAGAKI 83

A study on analyses of accidents by middle-aged and elderly workers engaged in janitor services Kozo MASADA, Naoshi KAKITSUBA, Juri TSUESAKI and Hiroki KIYOSAWA 89

The structural model of streetscape evaluation Kiwamu MAKI, Masao INUI and Yoshiaki NAKAMURA 95

Comparison with climate severity index and results by using principle component analysis in case of hokkaido Masanichi ENAI, Mihoko YOSHIIHARA, Hirofumi HAYAMA, Taro MORI and Kaai TAMURA 103

The effect of the peripheral color of visual target on visual acuity and subjective evaluation of the young and the elderly Michiko IWATA 111

Improvement of luminous and thermal environment in atriums by using shield cloths Part 1 a comparison of the measurement results of the environment in the atrium space with shield cloths and the atrium space without shield cloths Yoshiyuki SAKAI, Taro MORI, Masanori SUGAWARA, Masanichi ENAI and Hirofumi HAYAMA 119

A fundamental study on plaster board as 1/4 type wave absorber for buildings Tetsuo ENDO, Masahiro HANAZAWA and Osamu HASHIMOTO 127

Correlation analysis between photos of internal space and subjective impression using two-dimensional wavelet transform Yasumasa MIYATAKA, Naoki KATO and Katsuki FUJISAWA 133
