JOURNAL OF ENVIRONMENTAL ENGINEERING (Transactions of AIJ)

May 2005 Number 591

Sound environments in shopping spaces of large-scale stores — Sound measurements of stores in kumamoto city — Yashiro HIRAGURO, Keiji KAWAI and Takashi YANO

Verification and streamtube analysis of simulated results of airflow of a cross-ventilated buildings for various wind incident angles Analysis of airflow of cross-ventilated buildings based on les and wind tunnel experiment (part 2) — Takashi KURABUCHI, Masaaki OHBA and Tomoyuki ENDO

Network modeling and its validation for wind-driven behavior of a hybrid ventilation system for multifamily dwellings — Ken-ichi SATO, Takaosawachi and Akira HOYANO

Emission rates of chemical substances on electric heating appliances A study on the emission of chemical substances from household products (part 1) — Atsuo NOZAKI and Yasuaki ASANO

Vocs emissions from unvented kerosene-fired space heaters A study on the emission of gaseous pollutants from unvented combustion appliances (part 1) — Atsuo NOZAKI, Tomoki ORIBASA and Susumu YOSHIZAWA

Influence of supply opening size, ventilation air volume and mixing fan on measuring vocs emission rate in large chamber — Nobuhiro MIURA, Shin'ichi KATO and Makoto YAMAGUTI

Experiment and numerical analysis on mechanical supply system for 2nd floor and crawl space supply system — Study on the performance evaluation of hybrid ventilation system for detached house part 2 — Hiroshi YOSHINO, Soohun YUN, Jonghoon LEE, Jun WADA and Jing LIU

Study on occurrence and influence of instant positive pressure in model of high-rise apartments Basic research regarding to the drainage performance evaluation to drainage stack system with food waste grinder part 1 — Yosuke MINAMI and Masayuki OTSUKA

Case study on the bluish water phenomenon in copper piping system — Toshihiro YAMATE and Saburo MURAKAWA

Cooling effects on a built-up area caused by cold air drainage on summer night — Hideki TAKEYASHI, Masakazu MORIYAMA and Hideki SHIBAike

Urban heat island mitigation and its effects on energy consumption A case study of urban greening in the tokyo metropolitan area on typical summer and winter days — Yuihiro HIRANO

Analysis of land cover change and desertification in inner mongolia semiarid region by landsat data — Jun AO, Ikuo SAITO and Osamu ISHIHARA

A living environment evaluation method based on the residents' participation using the "living environment map” Development of improvement systems for the living environment by a residents' association through preparing the “living environment map” part 1 — Tetsu KUBOTA, Masao MIURA, Ayumu MIZUNO and Shuhei INOKUMA

Development of hourly weather database and characteristics of climatic change for main chinese cities — Qingyuan ZHANG
