JOURNAL OF ENVIRONMENTAL ENGINEERING (Transactions of AIJ)

June 2006 Number 604

Sound environments in arcades Sound measurements in kumamoto and nagasaki city—
Yasuhito HIRAGURI, Koji KAWAI, Makihiko TSUJIHARA, Kena KAWAKAMI and Takaaki YANO 1

Study on excitation forces due to human rhythmic action of concert audience Ryota INOUE and Yutaka YOKOYAMA 9

Development of a measurement system for shgc and u-value Study on shgc and u-value for fenestration and shading system part 1 Chiharu KURAYAMA 15

Development of practical design method for wooden wall assemblies in mild climate regions based on frequency of relative humidity Part 1 proposal for practical design method to avoid moisture damage and verification of ham analysis model Hiroaki SAIJIO, Yutoo SAKAMOTO, Tatsuo SAWACHI and Hirosho SETO 23

Les analysis on atmospheric dispersion in spatially-developing turbulent boundary layer in actual urban area Tetsuro TAMURA, Hironissa NAKAYAMA and Yasuo OKUDA 31

A study on concentration of acetaldehyde using an experimental house Hiroshi YAMADA, Shinichi TANABE and Motoya HAYASHI 39

In situ tests about the influence of air ions on contamination caused by airborne microorganisms and vocs U YANAGI, Naoki KAGI and Koichi IKEDA 45

Study on measurement of di-2-ethylhexyl phthalate from building products by micro chamber method Kunihito IISHINO, Shinji KATO and Yoji ATAKA 51

1-year investigations of indoor airborne microbial contamination in a small hospital Kana YAMADA, Takaehito SANO, Koichi IKEDA and U YANAGI 57

Experimental study for the combination of two air supply systems with the hybrid ventilation system controlled by a pressure difference sensor Study on the performance evaluation of hybrid ventilation system for detached house part 3 Sanghun YUN and Hiroshi YOSHINO 63

A study on performance evaluation and control method design for a hybrid airconditioning system with a combination of natural ventilation and ceiling fans Kitaro MIZUIDE, Hisaya ISHINO, Kimiko KOHRI, Akihito NAGATA, Tatsuo NAGAI, Kazuhito OTAKA and Kazuya OOHARA 69

Study on application of treated wastewater from jokaso system to rooftop greening Yoshinori TAKEZAKI and Yoshihiro SANKAI 77

The experimental study on effective utilization of unused resources for jokaso system Yoshinori TAKEZAKI and Yoshihiro SANKAI 85

Research on recycle process and energy consumption about recycle of construction waste Yaniko OiAWA and Weijun GAO 93

Study on relationship between energy saving economy in building facilities and CO₂ emission right price Akira TAKAKUSAGI 101

Reuse system of building steel structures Careful demolition of low-storied steel structures Masanori FUJITA, Shigeoki TANAKA and Manoru IWATA 109
