JOURNAL OF ENVIRONMENTAL ENGINEERING (Transactions of AIJ)
September 2006  Number 607

A trajectory model of flame/plume ejected from a fire compartment with regard to the wall effect above the opening  A study on fire spread caused by flame/plume ejected from the opening  part 2
Kensisuke HIMO, Tsuneto TSUCHIHASHI, Yoshiaki TANAKA and Takeyoshi TANAKA

A three-dimensional heat flow analysis model of steel structural members upon fire exposure —Prediction of temperature of exterior steel structural members exposed to fire—
Kayoko MIZUNO, Takao WAKAMATSU and Tatsuaki TANAKA

Development of a physics-based urban fire spread model
Kensisuke HIMO and Takeyoshi TANAKA

The consideration in steady adaptation state by young girls  The study on the evaluation method for easily moving up and down steps in consideration of the interaction of the visual factors and the size of steps  part 1
Namio NISHIMURA and Youko INOUE

Measurement and simulation of mass-transfer coefficient through testing of photocatalyst-based exterior materials
Hitoshi TAKEDA and Satoshi MIYAMICHI

Local dynamic similarity concept and underlying wind tunnel tests  Prediction accuracy of flow rate of cross-ventilated buildings  (part 1)
Takashi KURABUCHI, Masaaki OHBA, Tomoyuki ENDO and Yoshihiko AKAMINE

The numerical and theoretical analysis of the glass and acrylic desiccator methods
Masaoki HANEDA, Shin-ichi TANABE and Rika FUNAKI

Experiment and cfd analysis of ozone—terpene chemical reaction in 2d test room
Kazuhide ITO

Influence of adsorption at wall surface on material transfer rate characteristics in large chamber and appropriate position for concentration measurement
Nobuhiro MIURA, Shinako KATO and Makoto TAMAGUTI

Evaluation of basic thermal behavior by field test and measurement  A study on crawl space heating for detached houses in mild climate region  part 1
Koji FUJITA, Atsushi IWAMAE, Takayuki MATSUSHITA, Kenji KITAGAWA and Haruo HANIBUCHI

A basic study on development of fault detection and diagnosis tool for building air-conditioning system
Young-hak SONG and Yasunori AKASHI

Study on energy saving effect at a district heating and cooling plant utilized with unused energy
Comparison of energy consumption between heat source system utilized with temperature difference energy of sea water and conventional heat source system
Kenichiro WATANABE

Effect of thermostatic mixing faucet and shower head with stop valve  Study on performance test of water saving fixture
Takeshi KONDO, Shiroya IWAMOTO, Noriyoshi ICHIKAWA and Motoyasu KAMATA

Comparison between english and japanese in perception of private garden-views:  By means of nationality discrimination
Masako YAMASHITA, Kazunori HANYU and Hiroshi OMORI

Proposal of risk financing method to secure business continuity
Satoru NISHIKAWA, Seiichiro FUKUSHIMA and Harumi YASHIRO
