JOURNAL OF ENVIRONMENTAL ENGINEERING (Transactions of AIJ)
December 2007  Number 622

An influence of acoustic structure on orchestra conductor  — A basic study on stage acoustic design for conductor —..............................Yasumichi TOKUNAGA and Takane TERASHIMA 1

Luminance variation and sense of perspective for facade components of illuminated building ..........................................................Masakazu MASUYAMA and Yoshiaki NAKAMURA 9

The effect of the ratio of blind slats luminance to outside luminance on occupants' satisfaction with a view through blinds ...........................................Daisuke ITORI and Tohno IWATA 17

Experimental study on the characteristics of air flow and heat load at the temperature boundary layer of a indoor glass used for building skin ..............................................................................................Haru YAMAGUCHI and Takeshi SANO 25

Thermal performance of rooftop greening using a porous base planted with sedum ............................................................Toshihiro SANKAI and Yoshinori TAKAZAKI 33

Thermal comfort of traditional narrow alleys in an urban area — Survey for nishijin district in kyoto — .............................Motohiro MAJIMA, Noriko UMEMIYA, Harumori YOSHIDA and H.B. RIJAL 41

Effect of carbon tax and electricity buy-back on the optimal economic adoption of pv system for residential buildings ..........................................................Hongbo ZEN, Weijun GAO, Yingjun RUAN and Toshiyuki WATANABE 49

Estimation of second order rate constant of ozone — limonene reaction and soa generation .........................................Kazuhide ITO 57

Part load characteristic of cop of residential air conditioner based on measurement in artificial climate chamber  Heating/cooling cop and energy consumption of residential air conditioner part 1 ..........................................................Akinori HOSOI, Takao SAWACHI and Hisashi MIURA 65

Daily and seasonal fluctuation of residential hot water consumption ........................................................................Masayuki MAE, Naoko TAKASU, Minako NABESHIMA, Noriyoshi ICHIKAWA, Akihiko IIO, Motoyasu KAMATA 73

Development of rainwater reclamation system with water circulation — Evaluation of water purification performance of a pilot plant — ..........................................................Katsunori DEMURA, Yusuke YAMAMORI and Koetsu KIKUCHI 81

Evaluation for booster pump system in office buildings ......................................................................................Kazuhiko SAKAMOTO, Saburo MURAKAWA, Yasuo KOSHIKAWA and Hiroshi TAKATA 89

A study on the indispensable factors in the toilets of the schools through the children's way  No. 2 research of the primary and junior high schools in nagano-city .................................................Satoshi ASANO, Yoshitomo ASANO and Hideki TAKAMURA 95

Multivariable analysis on evapotranspiration of thin green roof units in summer season .................................................Mika YOSHINAGA, Naoya HIRUMA and Masaya OKUMIYA 101

Residents' assessment of actual states of living environment based on data of measurements with their participation  Comparison of case studies in 4 residents' associations ........................................................................................................Masao MIURA, Nanto KOYASU, Gen SATO, Osumu SAKURAI and Sobei SEKI 107

An experimental study on the environmental management of work to remove sprayed asbestos  ................................................................................Yukinori FusE, Yoko NACHI and Hideo FUKAI 115

Proposing a process by based on kdd and verifying the algorithm of discovering the wall element  A study on discovering the architectural shape element (part 2) .................................................................Satoru IETA 123
