Thermal properties and strength developments of mass concrete using fly-ash

Kenji FUNAMOTO, Shigenori HOUGUCHI and Atsushi SASAHARA

Stochastic study on size effect in tensile strength of short-fiber reinforced cementitious composites

Kenji YAMADA, Hiroto MIHASHI, Naozumi ITAGAKI and Satoru ISHIYAMA

Analytical study on deformation and fracture behavior of confined concrete under shear force

Takashi HIRAIZUMI, Yamao TANIGAWA and Hiroshi MORI

Evaluation of adhesive strength between epoxy resin floor coatings and cement mortar substrate

Masahiro UCHIDA and Koji TANAKA

Inelastic dynamic response characteristics of torsionally unbalanced multi-story models

Masaharu TAKAYAMA and Yuichi KIMURA

Analytical study on seismic performance of conventional wood-framed houses with unbalanced distribution of shear walls

Hiroshi IKUTA, Hiroshi KAWASE and Naotane TAGA

Study on dynamic characteristics of alluvial medium by dgc of rectangular foundation

Takujii KOBORI, Tetsuo TACHIKAWA, Katsunobu YADOMI and Renji KANEKO

Sub-structure pseudo-dynamic test scheme suitable for bending-shear type flexible steel frames

Keiichi OHI, Xiaoqiang LIN and Koichi TAKANASHI

Calibration of strong motion prediction method using statistical green's function and its application to hypothesized fukuoka earthquake

Shigeo ITOH and Hiroshi KAWASE

Comparisons of damage data for the 1923 kanto earthquake and strong ground motion in tokyo

Takafumi MORIO and Masayuki TAKEMURA

Cutting pattern optimization of frame-supported membranes considering boundary shape and stress ratio as design parameters

Roji UETANI, Eisuke MITSUDA and Makoto OHSAKI

A method for the symmetry limit and the in-plane limit analyses of space frames subjected to cyclic horizontal loading

Takeshi MASUI and Koji UETANI

Structural analysis of hybrid tensile structures consisting of cable, membrane and rigid members

Ming WU and Hiroshi OHMORI

Shape functions of generalized solutions of linear static problems of a circular arch and these application to linear analyses

Yoshihisa MINAKAWA

A study on bond splitting strength of double layered beam bars

Takuo TABATA, Hiroshi NISHIHARA, Noritaka MOROHASHI and Tomoyuki SAKURADA

Experimental study on effect which mechanical property of beam material gives to deformation capacity of beam to column welded connection

Tadashi NAKAGOMI, Kou MATOBA and Mamoru IWATA

Earthquake response simulation of multi-bay steel frames with unevenly located braces

Kenichi OHI, Seung-Jae LEE and Xiaoqiang LIN

Lateral buckling and flexural torsional behavior of z-section beams

Toshiro SUZUKI and Izumi IWAMOTO

Experimental study on durability of galvanized light-gauge steel shapes

Yoshifumi SAKUMOTO, Hiromasa NOMURA, Masamitsu MATSUMOTO, Atsushi NINOMIYA, Toshiaki MIYAO and Yoshitaka SAKAMOTO

Experimental study on post-local buckling behavior of cft beam-columns under cyclic loading

Jin KAWAGUCHI and Shoake MORINO

Ductility and $d_c$ value of steel encased reinforced concrete buildings

Ryoichi SHOHARA and Mareyana DOI
