Characteristics of porosity as quality evaluation items of porous aggregates
Takahiro MIURA, Masafumi KIKUCHI, Akio KOYAMA and Junji AKIBA 1

A study on autogenous shrinkage of cement mixes
Tomoaki HIRITA and Toseitaro NAWA 9

Hydration rate and strength development of cementitious material under freezing or dry condition
Yamiko SUGO, Osamu KATSURA, Yoshiyuki YOSHINO, Toshiji MIMORI and Yukio HAMA 17

Constitutive law of heat liberation for concrete using low heat cement
Shigeharu NAKAMURA, Yoshihiro MASUDA and Sachie SATO 23

A study on appracticability of shear lag theory for evaluating stress in surface components bonded
Hiroshi JINNAI, Shosuke KUROWA and Mitsutaka HAYAKAWA 39

on reinforced concrete building
Tsunagami WATANABE and Akio BABA 31

Strength development and porosity of high strength hardened cement subject to high temperature
Hiroshi JINNAI, Shosuke KUROWA and Mitsutaka HAYAKAWA 39

history at early age
Yasuo TANIGAWA, Hiroshi MORI and Takaaki OHKUBO 47

Study on limit stress at shear failure of fresh mortar by microscopic approach
Yuki HAMA, Koto RYU, Osamu KATSURA and Yoshiyuki YOSHINO 55

Properties at early ages and strength development of hot concrete for cold weather concreting
baogen HUANG, Takamasa MIKAMI and Eiji SAKAI 61

Time-dependent reliability analysis of structural systems
ki KOH 67

Relationship between safety margin of shear strength and probability failure during
Hajime OKANO and Toshiro MAEGAWA 75

degree
Hajime NAKAGAWA and Koichiro ASANO 83

On a response analysis method by equivalent linearized systems for passively controlled structures
Shinji ISHIHARA, Eiji EJIMA, Hidenori ISHIHARI and Kazuhiro MORIKAWA 91

Optimum seismic response control of structural systems using maxwell-type non-linear viscous damper
Shinji ISHIHARA, Eiji EJIMA, Hidenori ISHIHARI and Kazuhiro MORIKAWA 91

Study on cutting of steel columns in blasting demolition of steel structural buildings
Katsuyoshi KATO, Yuki NAKAMURA, Akira MATSUO, Yoji OGATA, Kiyoshi HASHIZUME and Kazuo KONDO 99

Study on design method for a large-scale cylindrical earth retaining structure
Kousuke ARIZUMI, Toshio KUMAGAI, Atsuo KASHIWAGI and Toshiro ADACHI 107

Development of the parallel processing system using a pc cluster for dynamic analysis of large-scale
space frame structures
Masaru MURATA, Kyoichi SHIBATA, Kouei SHINTAI and Hiroaki MOCHIZUKI 115

A study on rc structures used the recycled aggregate concrete
Reiji TANAKA, Seiji MIURA and Yoshihiko OHAGA 123

Flexible behavior of reinforced concrete composite beams with pre-cast units cracked due to construction
load
Shuichi SHIBUYA and shenbo LI 131

Earthquake-resistant properties of slim reinforced concrete pile
Takuya NAGAE, Keiichi KATORI and Shinsuke HAYASHI 139

Evaluation of ultimate shear strength of reinforced concrete columns having wing walls retrofitted
Masato ISO, Yasuhisa MATSUBARA, Yasuhiro SONE and Hiroaki NAKAMURA 147

An investigation on flexure strength of columns with wing walls
Miyuki OHMIYA and Shinya HAYASHI 155

A fundamental study on development of new supporting system of rc base columns in which
the columns never fail in flexure
Hisato HOTTORI, Hirokazu IHEKURO and Katuki TAKIGUCHI 163

Strength of h-shaped brace constrained flexural buckling having unconstrained area at both ends
Takaomi USAMI and Hirofumi KANEKO 171

Design formula using stress block concerning local yield strength of the connections defined by slope
factor method
Takasumi HIRED, Touki NAKADA, Osamu UTUSI and Terui SEKAWA 179

An experimental research on composite bearing-wall using deformation of viscoelastic material
and elastic buckling deformation of steel plate
Hirotsugo KONODA and Isamu TSUKAGOSHI 187

Basic study to apply cfrp pipes to structural use
Kensuke YONEZAWA, Tadashi FUJII, Kearnis SUZUKI, Teruyuki NAKATSUI and Hiroaki SUZUKI 195

Seismic hydroelasticity for fixed hollow cyindrical structures surrounded by thin ice sheet of finite
width
Takaji HAMAMOTO, Hiroaki OONISHI and Masashi INOUE 203

ARCHITECTURAL INSTITUTE OF JAPAN
NII-Electronic Library Service
