JOURNAL OF STRUCTURAL AND CONSTRUCTION ENGINEERING
(Transactions of AIJ)

January 2002  Number 551

Study on influence of moisture curing on strength development of high-strength concrete
Sachio SATO, Yoshihiro MASUDA, Shigeharu NAKAMURA, Tadatsugu KAGE and Hisashi SUGIYAMA

Investigation of conditions for simple insulation curing corresponding to temperature history of concrete structure
Koto RYU, Yukio HAMA, Fuminori TOMOSAWA and Takashi KUWAHARA

Wind load combinations for low-rise buildings
Hiroto KIKUCHI, Yukio TAMURA and Kazuki HIBI

The applicabilities of the les in curvilinear coordinate system to the flow around a two-dimensional square cylinder in homogeneous turbulent flow
Yoshinori ONO and Tetsuro TAMURA

Study on earthquake risk assessment by regional vitality evaluation Part 2 earthquake risk assessment by economic vitality evaluation for tokyo bay region
Keiichi TANABE and Sumio NAGAHASHI

Determination of spatial distribution of response spectral ratios from dense array data
Hideji KAWAKAMI and Hidenori MOGI

Mechanical models for softening and hardening type nonlinear viscoelastic dampers
Satsuya SODA, Kazushige KAKIMOTO and Eiichi SEKIYA

Detection of building damage areas due to earthquakes using satellite SAR intensity images
Masahiro MATSUOKA and Fumio YAMAZAKI

Method to estimate overturning ratios of furniture during earthquakes
Mika KANeko

Point bearing capacity of non-displacement piles in hard cohesive soil by model tests
Yukio KOBAYASHI

Stresses and strains in soil around model pile subjected to quasi-static vertical loading
Hiroshi KUBOTA, Fumio KUWAABARA, Masahito TAMURA, Namihiko INOUE and Akio ABE

Lateral subgrade reaction of single pile in soil reduced effective stress during an earthquake
Shinsuke NAMBA, Koji TOMINAGA, Haruyuki YAMAMOTO and ting XU

Relationship and seasonal influence of the creep behavior on glumam member, joint and frame under non-controlled condition
Shigeo TAKAHASHI, Toshio KITAMURA, Takuro MORI, Akira SASAGAWA and Hiroshi ISODA

Relationship between earthquake-resistant property and amount of lateral reinforcement of ppc pile
Takuya NAGAE, Shinti KISHIDA, Takahito YANASE, Keichi KATORI and Shizuo HAYASHI

Experiments on beams with recycled concrete used fine aggregate of melting slag from municipal solid waste (Part 4 a study on structures used the recycled aggregate concrete)
Reiji TANAKA, Manabu KITATSUJI, Hayato TOKIE and Yoshihiko OHAGA

Structural performance of reinforced concrete frame with non-structural reinforced concrete walls
Tomoaki SUGIYAMA, Yasuhiro MATSUZAKI and Katsuhiko NAKANO

Fracture mechanics analysis of beam-to-column connections under dynamic loading
Tadao NAKAGOMI, Kazushige ARIMUCHI, Noboru KONDA and Kou MATOBA

Unified strength evaluation of bolted joints
Ben KATO

A study on structural behavior of thin-walled stainless steel of tubular branch joints
Toshiki OGAWA, Yoshihiko KIMURA, Tomohiro KORIYA and Tetsu ISOHATA

Full scale shaking table test on ultimate seismic resistance of advanced type of beam-to-column connections
Hiroshi AKIYAMA, Satoshi YAMADA, Yuka MATSUMOTO, Toru TAKEUCHI and Hirokazu SUGIMOTO
