Experimental study on water-leaking form for concrete work ……… Seiichi WATANABE, Shin MURAKAMI and Mutsuko TANAKA
Pressure drops across vented wall cavity in steady state and its effect on water penetration — Study on pressure drops across wall cavity in pressure equalized wall design (part 1) — Hirozou ISHIKAWA
Thermal degradation simulation of elastomeric roofings based on estimated temperature exposed outdoors ………… Takashi TOMITA, Norimoto KASHINO and Hitoshi HAMASAKI
A study on the toughness recovery and durability retention of cracks repaired various concrete specimens ………… Masaki TAMURA, Yoshinori KITSUTAKA, Kenji ARAI and Koichi MATSUWA
Seismic risk management of a building in seismically active region ………… Yui TAKAHASHI, Nobuo MASAKI, Kazunori ANAHARA and Hiroshi ISODA
Evaluation and synthesis for seismic responses of structural system with inter-story isolation devices ………… Tadamiichi YAMASHITA, Yoichi MUKAI and Yutaka INOUE
Equivalent linearization to predict dynamic properties and seismic peak responses of a structural system with high viscous damping and hysteretic damping ………… Kazuhiko KASAI and Yoshihumi KAWANABE
Approximation algorithm for robustness functions of trusses with uncertain stiffness under uncertain forces ………… Yoshihiro KANN0 and Izuru TAKEKAWA
Vertical loading tests of friction pile group and bearing mechanism based on finite element method ………… Atsushi ITO, Shuji HONDA, Norihiro KOSHIGOE and Yui SHIMOHIRA
Pile installation tests of screwed piles in a calibration chamber ………… Fumikazu OHISUGI, Tutomu TSUCHIYA, Masao SHIMADA and Katsuyuki YOSHIDA
The mechanical behaviors of the reversed catenary reinforced concrete shell with openings The effect of the position of openings under the different loading modes ………… Naoya SUZUKI and Makoto TAKAYAMA
Structural analysis applied a model of stress-strain curves considering stress relaxation of membrane material Fundamental study on stress relaxation of tension membrane structures part 2 ………… Hajime NAKAJIMA, Masao SAITO, Fumio KUROKI and Akira OKADA
Fundamental research of new mud-walls daubed with recycled and by-product materials ………… Yasuo KATAOKA, Koji OGAWA, Kohei KOMATSU and Atsushi TABUCHI
Application of sheathing area ratio by sugiyama's lab. for bearing wall with opening by wooden panels — A study on shearing behavior of bearing wall by wooden panel construction (part 1) — Hisamitsu KAJIKAWA, Hiroyuki NOGUCHI, Fumio KAMIYA, Toshitsuga HIRATA and Haruhiko OGAWA
Dynamic response of wooden model floor subjected to impact force ………… Eiichi FUJINO, Shuzo SUZUKI and Hiroyuki NOGUCHI
Prediction of earthquake response of story shear model by equivalent linearization method considering higher mode response ………… Hajime ORANO, Noriside KOSHIKA and Kazuhide YOSHIKAWA
An analytical study on influence of multi-story mullion-type walls of predominant bending failure in reinforced concrete structure ………… Hisato HUTTA and Takeshi KIMURA
Experimental study on failure behavior and energy absorption effect of r/c building with brace type damper based on dynamic cyclic loading ………… Keiichi SATSUMAKA, Kenpuke IDO, Toosoneh TANAKA, Haruyuki KITAMURA, Takumi ISHI, Tomohisa MUKAI and Satoru UENO
Experimental study on rfs column to vertical haunch — beam connections using external diaphragm with high strength bolts ………… Katshina NISHIMURA, Yoshihiro FUJITA, Yoshiyuki FUKUMOTO, Kyoshi MASUO and Seiji MUKAIDE
Experimental study on beam-column connections for a sustainable building structure system ………… Ken OKADA, Shihebaru YAMAMOTO, Satoshi YAMADA and Mamoru IWATA
Flexural strength on the damage limit state and initial rigidity of high-performance beam by analogy with intercolumn fringe microstructure ………… Kentaro YAMAGUCHI, Yasuomi MATSUFUJI, Tomoya KOYAMA and Hidehiro KOYAMA
A method by the truss-model that estimates load-deformation skeleton curve of concrete-filled tubular column lap-joint ………… Seiji AKIYAMA
Damage detection in offshore jacket platforms based on partial measurement ………… xiang SHI, Tetsuya MATSUI, Keijiro MIZUNO and Hiroshi OHMORI
