JOURNAL OF STRUCTURAL AND CONSTRUCTION ENGINEERING
(Transactions of AIJ)

September 2007  Number 619

Study of height at placing on behavior of fresh concrete compacted by the horizontal vibration method

Hai Feng CHEN and Shinji KAWABE

Compressive strength and drying shrinkage to opening ratio of water-leaking wall form and leak
water volume Experimental study on water-leaking form for concrete work part 2

Seiichi WATANABE, Shin MURAKAMI and Mutsuko TANAKA

Experimental study on the properties of concrete containing fly ash in mass concrete member

Hideo KASAMI, Toru KAWAUCHI, Manabu HAMAMOTO, Kyosuke EGUCHI, Takuaki SONE and Kenichi MORIYA

Effect of rainfall on the moisture distribution in exposed concrete

Dong woong RYU, Jeong won KO, Manabu KANEMATSU and Takaumi NOGUCHI

A study on the quantification of the effect of dynamic transformation for the weatherability of construction
sealants

Noriyoshi ENOMOTO and Kyoji TANAKA

Evaluation of multiple house renovations concerning the movement of standing up and sitting down, stepping up and down A study on evaluation of residential environments for the nursing care prevention part 4

Kenji KARIYA and Yutaka YOKOYAMA

Study on wind response characteristics of base-isolated buildings with creep

Hachinori YASUI, Takeshi OIKUMA and Hisao MARUKAWA

Study on the generation and propagation process of the surface wave in the sedimentary layer which constitutes rather long-period strong motion

Koichi SAGUCHI, Kentaro MOTOKI and Kazuho SEO

A study on earthquake response control of relative story displacement of passively vibration-controlled
high-rise buildings with non-proportional distribution of linear well type dampers Analysis of earthquake response mechanism by frequency response function with complex stiffness

Masaaki KOBAYASHI, Haisi SATO, Yuichiro HORIE and Tadaki KOH

Adaptive forward-backward system identification for seismic damage detection of building

Fumio KIBITA, Kenji KANAZAWA, Nobuki MORIKIY and Haruyuki KITAMURA

Creation of damping mechanisms using topology optimization method of continuum

Daiki FUJII and Tsuyoshi TANIZAWA

Sloshing and dynamic interaction between liquid and a floating roof in a cylindrical storage tank subjected to seismic excitation Computer aided method based on coupled FE and analytical solutions

Tetsuya MATSUI

Model tests on collapse of masonry walls, "tsukishibui", under long-term load

Takeshi MASUI and Shinro YAO

Seismic response evaluation of lattice shell roofs supported by multitistory structures

Toru TAKEUCHI, Tomohiko KUMAGAI, Hiroo SHIBABE and Toshiyuki OGAWA

Influence on long-term axial column force upon shear force-displacement curve of sheathed shear walls
under in-plane shear test

Masaya FUJI, Shinya MATSUMOTO, Masahiko MURAKAMI, Toshikazu SUGIMOTO, Ryui INOUE, Toshiyuki KANYAMA and Kohji KOMATSU

Splitting stresses in notched timber beams Study on steel-frame structures part 1

Ken RAMACH, Naoto ANDO, Manabu INAYAMA and Masahide MURAKAMI

New method to estimate the load-slip characteristics of the double shear bolted timber-to-timber joints

Hitoshi KWAMURABA

Experimental study on residual axial load capacity of r/c columns

Daisuke KATO, huuhuan LI, Yukiyo NAKAMURA and Yoshimasa HONDA

Evaluation of shear strength for pva-epc member and shear transfer mechanism on crack surface

Katsuyuki SHIMIZU, Toshiyuki KANAKUBO, Tetsushi KANDA and Satoru NAGAI

Collapse test of shear-failing r/c columns by substructure pseudo-dynamic test method

Takaya NAKAMURA, Manabu YOSHIMURA and Susumu MINAMI

Shear strength of reinforced concrete columns centrally jointed with spandrel walls

Shinichi SHIOOYA and Kazushiro TOBOU

Strength evaluation of wide flange steel connections with transverse stiffeners considering local flange bending

Hiroshi TAGAWA and cuiping LIU

Required bracing stiffness to give the specified effective length In symmetrical braced frames

Masae KIDO and Keigo TSUDA

Estimation of cumulative deformation capacity for buckling restrained braces placed in elasto-plastic frames

Tora TAKEUCHI, Kentaro MIYAZAKI and Mameru IWATA

Column base system of steel structures employing steel fiber reinforced cementitious composite
Fracture mode and deformation characteristics of applied model with joint-height ratio of 0.75 and 0.65

Yoshiro KANeko, Hiroo MIIMASHI and Kazuaki KIRIKOSHI

Blast resistance of polyethylene fiber-reinforced concrete against contact detonation

Makoto YAMAGUCHI, Kyosuke MURAKAMI, Koji TAKEDA and Yoshiyuki MITSUI
