JOURNAL OF STRUCTURAL AND CONSTRUCTION ENGINEERING
(Transactions of AIJ)

December 2007 Number 622

Evaluation of mechanical properties of crushed stone for quality control of high strength concrete
Satoshi WATANABE, Yoshihiro MASUDA, Hiroshi JINNAI, Shusuke KUROIWA and Satoru NAMIKI

Evaluation of cracking potential of high-strength concrete induced by autogeneous shrinkage under the
quasi-complete restraint condition
Hirokazu HAYANO, Iheui MARUYAMA, Takafumi NOGUCHI and Takeshi TOCHIGI

Effect of strength development of high-strength concrete using different sorts of cements on elastic
modulus of elasticity
Yoshio NAKATA, Takehiro SAWAMOTO, Shozo OTSUKA and Nobuhito HARUYAMA

Basic study on pumpability of ultra-high-strength concrete
Rieko TERAUCHI, Mitsuaki HAYAKAWA, Hiroshi JINNAI and Shusuke KUROIWA

Assessment of elastic modulus of high-strength concrete with material segregation
Akira NISHIDA, Toshihiko KAWAMURA, Nobuyuki NISHI and Akihito YAMAZAKI

Applicability of water-retentive polymer to rooftop-planting porous concrete
Yoshitaka ISHIKAWA and yuozong JIANG

Application of computational fluid technique with high accuracy and conservation property to the wind
resistant problems of buildings and Structures Part 5 effect of thermal stratification on wake flow
and pressure distribution
Tsuyoshi NOZU and Tetsuro TAMURA

Characteristics of wind pressure and force on roof tiles with lift
Wind forces on roof tiles in full-scale
measurements part 2
Hajime OKADA, Takeshi OKUMI and Junji KATAGURI

Simulation of internal pressures in low-rise buildings induced by wind
Hiroshi UEDA, Kenji HISHI and Hironori KIKUCHI

A study on a generation of simulated earthquake ground motion considering phase difference characteristics
Part 6 generation method of simulated earthquake ground motion in terms of love waves
Takashi YAMANE and Sumio NAGARASHI

Local parameter estimation of frequency-dependent model using absolute acceleration record
Norio IWATA

Numerical analysis of stability boundary on elastic structures under combined loads by a perturbation
method
Toku NISHIMURA and Ayumi MAKINO

Non-linear behavior analysis of rc frame structure considering shear deformation of joint
Takesuke SAIJO, Takeshi KOSHIKAWA, Masaki UEDA and Masaru KIKUCHI

A study on application of nonlinear causal hysteretic damping model to multi-scale system soil model
Nonlinear ground response analysis considering both frequency dependency and strain amplitude (part 2)
Naohiro NAKAMURA

Analytical method for tapered pile under lateral load
Roji TOMINAGA, qazi CHEN, Masahito TAMURA and Akihiko WAKAI

New estimation method on stiffness and strength of single-shear screw joints with structural panels
Kenji KOBAYASHI, Masahiro INAYAMA and Naoto ANDO

Proposal of analytical models of wooden dowel shear joint
Single shear joint with slender-type round dowel
Hiroshi FUKUYAMA, Naoto ANDO, Masahiro INAYAMA and Masayuki TAKEMURA and Masafumi INOUE

Traditional wooden buildings of chinese cong race
Part 1 "muli" construction system of drum tower
Yasuo KATAOKA, Akihisa KITAMORI, Hirokiyuki OCHI, Yoichi TOYODA and Kosei KOMATU

Structural design method with wall-length ratio evaluation for precast reinforced concrete wall panel
houses based on crls
Junji OSAKI, Hiroshi KURAMOTO and Takamori KAWAMOTO

Verification of shear transfer mechanism based on contact theory
Study on shear transfer mechanism on
concrete crack surface part 1
Yuya KAKASE, Toshinaga WADA and Masaki UEDA

Discussion on meaning of regulations and their rationalization of seismic code for reinforced concrete
buildings
Hashihiro HIRAISHI, Eiji INAI and Toku FUKUSHIMA

Frictional rotation resistance of steel cone-to-cylinder socket connections
Study on steel cone-to-cylinder
socket connections part 2
Hiroshi KUWAMURA and Tatsuo ITO

Discussion on "development of analytical and experimental systems for blast demolition of framed structures"
Katsuaki TAKIGUCHI

The authors' answers to the discussion by prof. katsuki, takiguchi
...Daigoro ISobe, Masashi EGUCHI, Kensei IMANISHI and Zin SASAKI

ARCHITECTURAL INSTITUTE OF JAPAN
