TRANSACTIONS OF THE ARCHITECTURAL INSTITUTE OF JAPAN

June, 1979
Number 280

CONTENTS

(1) Experimental Study for Estimation of Solid Content of Concrete Aggregates —Effect of Particle Size Distribution on Solid Content of Aggregates— by Tomoyuki Goto, Member of A.I.J. .............................................. ( 1 )

(2) The Stability of the Periodic Solution and Approximate Solutions of Nonlinear Vibrations The Periodic Solution Problems of Nonlinear Equations of Motion—Part 5 by Dr. Youichi Minakawa, Member of A.I.J. ........................................ ( 11 )

(3) Experimental Study on Energy Absorption Capacity of Columns of low Steel Structures Part 2 Energy Absorption Capacity of H-Shaped Steel Columns Subjected to Cyclic Loading with Varying Deflection Amplitudes. by Dr. Toshiro Suzuki, and Ken-Ichiro Tamamatsu, Members of A.I.J. ........................................ ( 19 )

(4) The General Theory of A Thin- Walled Open Section Part 2. The Approximation of the General Theory by Hideo Takahatake, Member of A.I.J. .............................................. ( 27 )

(5) Analytical Study about the Bending of Elastic Plates with Opening Hele under Uniform Load Part 1: Square Plates with Eccentric Circular Hole. by Teruzi Iwahara, Member of the A.I.J. .............................................. ( 39 )

(6) General Buckling of Cylindrical Reticulated Shell Roofs with Arbitrary Generator Edges Part 1: Analytical Method of Nonlinear Basic Equations. by Tautonu Kokawa, Member of A.I.J. ...................................................... ( 53 )

(7) Vortex Induced Vibration of Circular Cylinder Part II Model of Vortex Induced Vibration. by Yukio Tamura, Members of A.I.J. .................................................. ( 67 )

(9) Studies on Elastic and Plastic Properties of SRC-Framed Shear Walls Part 1 Restraining Effects of Frames Seen from Indirectly Measured Values. by Hiroshi Imai, D. Eng., and Kazumasa Kosugi Members of A.I.J. ........................................ ( 91 )

(10) Elastic Analysis of Framed Shear Walls by Assuming Their Infilled Panel Walls to be 45-Degree Orthotropic Plates Part I—Analysis of Single-Span Shear Walls— by Masahide Tomii, Teisuke Sueoka and Hisahiro Hiraiishi, Members of A.I.J. .................................................. (101)

(11) Elasto-Plastic Behavior of Concrete Filled Square Steel Tubular Beam-Columns. by Masahide Tomii and Kenji Sakino Members of A.I.J. ........................................ ( 111)

(12) Study on the Outbreak of Fires Caused by Earthquakes —On the Relationship Between Spread of Fires in the Inside of Buildings and Its Factors— by Dr. Saburo Horiuchi, Hiroyuki Mizuno, Yoshiteru Murozaki, and Muneto Hino, Members of A.I.J. .................................................. (123)

(14) Experimental Study on Measurement of Turbulence in Wind Runnel Measurement with Thermistor-Anemometer Having High Response— by Yoshiteru Iwasa, Yoshitriro Mataki, Yasuzo Fukao and Noriko Miyuki, Members of A.I.J. .................................................. (143)

(16) On the Relationship Between Urban Structure and Pattern of Redevelopment in Osaka Region. by Rokuro Tominaga, Dr. Yoshiaki Honda, Members of A.I.J. ........................................ (161)

(17) A Preliminary Study on the Ospedale Maggiore of Antonio Averlino Called Filarete. by Kenichiro Hidaka, Member of A.I.J. ........................................ (171)

(18) On the Tokyo Planning by ENDE & Böckmann at Meiji Era. Part 4 by Terunobu Fojimori Member of A.I.J. ........................................ (179)
