[Foreword]
Activities in the 25th Anniversary Year of JSIAM .................................................. Keiko Imai ........ 1

[Awards]
Best Paper Award 2015 ........................................................................................................ 2

[Invited Papers] Deepening and New Current for Origami Engineering
Preface for the Feature Articles Titled “Deepening and New Current
for Origami Engineering” .................................................. Ichiro Hagiwara ........ 5
Origami and Deployable Structures .......................................................... Kazuya Saito ........ 9
Origami Design Method Using Conformal Maps ....... Sachiko Ishida and Ichiro Hagiwara ..........15
Aiming for Origami 3D Printer Superior to Layered 3D Printer ........ Ichiro Hagiwara ........ 22

[Industrial Materials]
Time Series Modeling Ship’s Motions and Application to the Shipborn
  Monitoring System.................. Kohei Ohtsu, Kiyokazu Minami, Hiroyoshi Funada, ..........29
  Tohru Itoh, Mitsuru Sakaguchi and Eiji Ishiyama

[Tutorial]
Network, Permutation, Formalization towards Post Modern Coding Theory,
  Vol. 1: Modern Coding Theory .................................................. Manabu Hagiwara ..........33

[Forum]
Promenade of Applied Mathematics(84)
  How I Started “the Least Squares Method” .................................................................. Yoshio Oyanagi ..........39

[JSIAM News] .................................................................................................................. 43
