Error and Correction

Please see below for errors and corrections of legends of Figure 1.

Corrections are in bold type

**Figure 1.** HDL-C level categorized by *H. pylori* seropositivity and BMI

Data are mean ± standard error.

- **Group A:** *H. pylori* seronegative and BMI<22
- **Group B:** *H. pylori* seropositive and BMI<22
- **Group C:** *H. pylori* seronegative and BMI≥22
- **Group D:** *H. pylori* seropositive and BMI≥22

HDL-C: high density lipoprotein cholesterol. *H. pylori:* Helicobacter pylori. BMI: body mass index.

Analysis of covariance (ANCOVA)* with HDL cholesterol levels in subgroups according to the status of *H. pylori* and BMI. Post hoc test for multiple comparisons was conducted by Bonferroni method.

*Covariates were age, fibrinogen, blood glucose, smoking and alcohol habits.
