Research Papers

Ueyama, Y., S. Sato and K. Nakajima: Heading Habit, Herbage Yield and Seasonal Growth of Tall Fescue (Festuca arundinacea Schreb.) Cultivars and Synthetics in the Warm Temperate Zone of Japan .................................................. 1

Maeda, Y.: Effects of Heat Treatments on Amino Acid Composition of Rumen-bypassed Protein in Roughages .............................................................. 10

Inoue, N. and S. Kasuga: Differences of Nutritive Value for Silage among Types of Sorghum ................................................................................................. 20

Inoue, N., F. Yamamoto, E. Sodeyama and K. Nishimaki: Comparison of Chemical Composition and In Situ Digestibility of Kernel among Different Genotypes of Maize (Zea mays L.) .................................................. 29

Nishimura, T.: The Stem Density of Orchardgrass (Dactylis glomerata L.) Drilled into Kentucky Bluegrass (Poa pratensis L.) Sod Affected by the Seeding Time, Nitrogenous Fertilization and Post-sowing Trimming .......................................................... 37

Sato, K.: Studies on the Macropore Structure of Soils Formed by Grass Roots 1. The morphology of the macropores in the meadow determined by X-ray and contrast media ................................................................. 44

Ito, K., Y. Ikegami and Y. Ishii: Effect of Defoliation from Middle Autumn to Early Winter on the Regrowth in Next Spring of Dallisgrass (Paspalum dilatatum Poir.) in the Lowlands of Southern Kyushu .................................................. 55

Masuda, Y. and Y. Kawamoto: Flowering Habit and Seed Production in Phasey Bean (Macroptilium lathyroides L. Urb.) ........................................................................ 64

Tominaga, T., H. Kobayashi and K. Urki: Clonal Variation in Salt Tolerance of Imperata cylindrica (L.) Braun. var. koenigii (Rez.) Durand et Schinz 69

Koyama, N., M. Shiomi and M. Tsuki: Dynamic Digestibility Model of Grasses on Grazing Grassland .................................................................................. 76

Matsa, Y. and N. Mizuno: Copper and Zinc Concentrations in Soils and Grasses of Horse Breeding Farms in Eastern Hidaka District, Hokkaido ........... 84

Kawanabe, S. and T. Zhu: Degeneration and Conservational Trial of Aneurolepidium chinense Grassland in Northern China .............................................. 91

Kawanabe, S. and S. Mukaiyama: Analysis and Diagnosis of Sown Pasture Vegetation 1. Classification of the pasture types in the west slope of Mt. Fuji ........... 100

Shinoda, M. and T. Manda: Relationship between Fermentative Quality of Silage and Ruminal Fermentation Products .................................................. 106

(Continued to inside cover)
