From Experience to A Science

"Rehabilitation Medicine inevitably being restructured"

(Taki) Takizawa, Shigeo, (Founder / Inventor)
Chair of the joint meeting of the 12th International Biophilia Rehabilitation Conference, Public Citizen Lectures and Workshop and the 19th Biophilia Rehabilitation Conference, Public Citizen Lectures and Workshop
President, International Biophilia Rehabilitation Academy
Professor, Biophilia Institute, the Designated and Registered Institute by the Japanese Ministry of Education, Culture, Sports, Science and Technology

It is my honor that I can present the keynote address as the chair of IBRC 2015, in which I emphasize that the restructuring of the rehabilitation medicine is indispensable.

I will show clearly what the heading means. It surely serves as the method for the RCT enforcement.
And then I present about the process which was the difficulty of us till today according to the speech of others, which I remained in my heart.

I designate the following matters in this presentation in order to clarify the importance of our study;
i) Some words concerning studies of Rehabilitation medicine;
ii) The reactions that have been shown by some persons concerned about the Rehabilitation Medicine restructuring;
iii) The social situation changing in relation to reactions;
iv) Recognition of the society related to our presentation.

I really hope that this presentation has a big meaning for maintaining the elderly and the advanced age disabled people living independently in the world. And I also hope you can share my experience each together.
It means that you can form rank with us to start develops of human beings' property and becomes an opportunity to contribute greatly.

I extend my heartfelt gratitude to all who want the super-aged society sustainable with joining our study.
