Editor's Message to Special Issue of Young Researchers' Papers

ETSUYA SHIBAYAMA^{1,a)}

For the further advancement of information processing technologies, more support is needed for young researchers who are doing research driven by freely exploring ideas and/or by curiosity. One of the most important missions of the Information Processing Society of Japan (IPSJ) is to promote activities by young researchers, including students, who will lead the next generation. The Journal of Information Processing (JIP) has a series of special issues, starting in 2014, for promotion of young researchers. This special issue is the fourth one of the series, jointly with the IPSJ Journal, another journal of the IPSJ that receives manuscripts in Japanese.

The editorial committee of this special issue was organized by those who are experienced editorial board and committee members of JIP. They tried to help young researchers with publishing their research outcomes in a timely and speedy manner. The committee received 10 submissions until the deadline, that is, June 6. In addition, the IPSJ Journal received another 25 submissions, so in total 35 manuscripts were submitted for the joint special issue. The first meeting was held online, and a meta reviewer was assigned to every submission no later than June 19. The second meeting was held on August 29, and it took about three months from the submission deadline to the notification of the first review result. The third meeting was held on November 28, and finally four articles were accepted for publication, while the IPSJ Journal accepted 10 articles in Japanese. It took another three months from the first notification to the final one.

I would like to express my gratitude to the authors of the submitted manuscripts, the reviewers for careful and thorough reading, the editorial board and committee members for editing this special issue in a timely manner, and the IPSJ staff for supporting the special issue.

The Editorial Committee

- **Editor in-Chief:**

Etsuya Shibayama (The University of Tokyo)

- **Associate Editor in-Chief:**

Akiko Aizawa (National Institute of Informatics)

- **Editorial Board Members:**

Nobuyoshi Asai (University of Aizu)

Koji Okino (Toyama University)

Tatsuki Sekino (International Research Center for Japanese Studies)

Hiroyoshi Watanabe (Teikyo University)

- **Editorial Committee Members:**

Daisuke Hatano (RIKEN)

Masatsugu Ichino (The University of Electro-Communications)

Nahomi Kikuchi (Oki Electric Industry Co., Ltd.)

Akihito Kitadai (J.F. Oberlin University)

Hiroyuki Manabe (NTT DoCoMo, Inc.)

Hiroyasu Matsushima (The University of Tokyo)

Masaaki Noro (Fujitsu Laboratories Ltd.)

Masao Ohira (Wakayama University)

Masaki Shimaoka (SECOM Co., Ltd.)

Yuki Tanaka (Gunma University)

Masahiro Toyoura (University of Yamanashi)
