SYSTEMS, CONTROL AND INFORMATION

Vol. 49  No. 9  SEPTEMBER  2005

CONTENTS

Special Issue on Advanced Displaying Systems and Their Applications

Expository Articles

Development of Autostereoscopic 3D Displays

..........................  Ken Mashitani, Masahiro Higashino, Takahisa Ando
and Hideyuki Kanayama  351

Monocular Wearable Display with a Low Divergence Light Source

.........................  Tatsuki Okamoto, Kohsuke Hirasa wa and Tetsuro Makita  357

High-fidelity Wide-gamut Display by Multiprimary Colors  363

Masahiro Yamaguchi

Immersive Projection based Scalable 3D Display System with Hemi-Spherical Screen:

CyberDome  374

Kazuya Sawada  369

Principle and Applications of IllusionHole  Yoshifumi Kitamura  374

Editorial Essay

..................................  Yoshitsugu Manabe  380

Lecture

Information Geometry – IX  Shun-ichi Amari  381

Questions and Answers

What is an Open Problem on Robotics?  Katsuyoshi Tsujita  387

International Conference

The 16th IFAC World Congress  Yoshio Ebihara  389
