CONTENTS

Special Issue on the Present State and Problems of Chemical Process Control

Editorial Essay
What’s Going on in Chemical Process Control Today

Manabu KANO

Expository Articles
Practice and Challenges of Chemical Process Control Engineers
— What they achieved in the past and should attack in the future

Morimasa OGAWA and Manabu KANO

A New Development of PID Controllers in Refinery and Chemical Processes
— A Unified Approach of ‘Control Performance Assessment and Controller Design’

Kenzo FUJII, Shigeki OOTAKARA and Toru YAMAMOTO

Current Status and Future Challenge of Model Predictive Control Technology in the Chemical Industries

Atsushi TSUDA and Hiroya SEKI

Model Predictive Control of Batch Processes based on the First Principle Models

Yoshikazu NOGUCHI, Masanori KOBARI and Yoshihiro HASHIMOTO

Alarm Management for Stable Operation and Industrial Innovation of Chemical Plants

Tsutomu TAKAI and Masaru NODA

New Technologies in Process Instrumentation and Automation

Nobuaki KONISHI and Yoshiyuki YAMASHITA

Questions and Answers
Flight control, which seems to have complicated structure but not so complicated structure in fact

Masayuki SATO

International Conference
IEEE The 10th International Workshop on Advanced Motion Control (AMC’08)
