## CONTENTS

### Regular Articles

**Fundamentals of High Temperature Processes**

- **737** A kinetic model of mass transfer and chemical reactions at a steel/slag interface under effect of interfacial tensions  
  P. Ni, T. Tanaka, M. Suzuki, M. Nakamoto and P. G. Jonsson

- **749** Influence of Al/Ti ratio in Ti-ULC steel and refractory components of submerged entry nozzle on formation of clogging deposits  

- **759** Surface tension calculation of molten slag in SiO$_2$–Al$_2$O$_3$–CaO–MgO systems based on a statistical modelling approach  
  J. Xin, N. Wang, M. Chen and L. Gan

### Ironmaking

- **768** Improvement of sinter strength and reducibility through promotion of magnetite ore oxidation by use of separate granulating method  
  M. Matsumura, T. Takayama, K. Hara, Y. Yamaguchi, O. Ishiyama, K. Higuchi, S. Nomura, T. Murakami, M. Hayashi and K.-i. Ohno

- **778** Effect of nut coke addition on physicochemical behaviour of pellet bed in ironmaking blast furnace  
  D. J. Gavel, A. Adema, J. Van Der Stel, J. Sietsema, R. Boom and Y. Yang

- **787** Direct reduction recycling of mill scale through iron powder synthesis  
  K. S. Sista, S. Dwarapudi and V. P. Nerune

- **795** A phase equilibrium of the iron-rich corner of the CaO–FeO–Fe$_2$O$_3$–SiO$_2$ system in air and the determination of the SFC primary phase field  
  J. Chen, M. Shevchenko, P. C. Hayes and E. Jak

- **805** Effect of gas atmosphere on the phase chemistry in the CaO–FeO–Fe$_2$O$_3$–SiO$_2$ system related to iron ore sintering  
  J. Chen, M. Shevchenko, P. C. Hayes and E. Jak

- **810** Numerical investigation of applying high-carbon metallic briquette in blast furnace ironmaking  
  H. Tang, T. Rong and K. Fan

### Steelmaking

- **828** Formation and evolution of non-metallic inclusions in calcium treatment H13 steel during electroslag remelting process  
  H. Wang, J. Li, C. Shi, Y. Qi and Y. Dai

- **839** Phosphorous partition and phosphate capacity of TiO$_2$ bearing basic oxygen steelmaking slags  

### Casting and Solidification

- **848** Effect of cooling rate on the solidification microstructure and characteristics of primary carbides in H13 steel  
  M. Mao, H. Guo, F. Wang and X. Sun

- **858** Effect of silicon on AHSS as-cast microstructure development and properties  
  R. C. Giacomini and B. A. Webley

- **865** Simulation of crack initiation on the slab in continuous casting machine by FEM  
  K. Toishi, Y. Miki and N. Kikuchi

- **872** Solidification structure, non-metallic inclusions and hot ductility of continuously cast high manganese TWIP steel slab  
  Y.-N. Wang

- **880** Interactive relationship between the superheat, interfacial heat transfer, deposited film and microstructure in strip casting of duplex stainless steel  

### Instrumentation, Control and System Engineering

- **889** Numerical simulation on interfacial creep generation for shrink-fitted bimetallic roll  
  H. Sakai, N.-A. Noda, Y. Sanó, G. Zhang and Y. Takase

### Chemical and Physical Analysis

- **895** Analysis of heat crystallization behavior of polyester film on laminated steel sheet  
  J. Kitagawa, Y. Yamanaka, Y. Yoshida, H. Nakamaru and K. Kojima

### Forming Processing and Thermomechanical Treatment

- **900** Heat transfer characteristic of slit nozzle impingement on high-temperature plate surface  

### Surface Treatment and Corrosion

- **908** Effect of low-temperature nitridation on sulfide stress corrosion of 321 austenitic stainless steel in H$_2$S-containing environments  
  S. Yu, J. Wang, H. Fan, X. Zhang, G. Chen, J. Yan, H. Dong and X. Li

(Continued on inside backcover)
Effects of surface microstructure on selective oxidation morphology and kinetics in $N_2 + 5\%H_2$ atmosphere with variable dew point temperature
M. E. Story and B. A. Webler

Mechanical Properties
Crystallographic characterisation of hydrogen-induced twin boundary separation in type 304 stainless steel using micro-tensile testing
S. Ueki, K. Koga, Y. Mine and K. Takashima

Note
Effect of nitrogen on planar anisotropy of the $r$-value and texture in lean duplex stainless steel sheets
J.-I. Hamada and H. Inoue

Announcements from ISIJ
