CONTENTS

Review Articles
Transformations and Microstructures
2677 Recent studies on the nature and state of carbon atoms in iron
H. OHTSUKA and K. TSUZAKI

Social and Environmental Engineering
2687 Iron powders as a potential material for arsenic removal in aqueous systems
K. S. SISTA, D. KUMAR, G. R. SINHA, A. P. MOON and S. DWARAPUDI

Regular Articles
Fundamentals of High Temperature Processes
2703 Prediction of final solidification position in continuous casting bearing steel billets by slice moving method combined with Kobayashi approximation and considering MnS and Fe₃P precipitation
W. WANG, H. ZHANG, K. NAKAJIMA, H. LEI, G. TANG, X. WANG, W. MU and M. JANG

Ironmaking
2715 Effect of heating rate on carbothermic reduction and melting behavior of iron ore-coal composite pellets
H.-H. CHANG, I.-G. CHEN, K.-M. LU and S.-H. LIU
2724 Activity of MgO in CaO–SiO₂–MgO–Al₂O₃ melts for blast furnace slag at 1 873 K
Y. GUO, P. SHEN, H. ZHENG, B. WANG, X. JIANG and X. GUO
2731 Thermodynamic simulation and transformation behaviours of lead during iron ore sintering
Y. WANG, W. LI, X. FAN and M. BAI

Regular Articles
2745 Effects of simple and complex minerals in the alumina-silica-magnetite ternary system on coke analogue reactivity
R. J. LONGOTTI, Z. WANG, K. HOCHINDO and B. J. MORAGHAN

Steelmaking
2754 Hot slag modification with mechanical stirring: Motion and dispersion characteristics of modifier particle
C. ZHANG, N. WANG and M. CHEN
2765 Micro-level insight into the surface tension-structure relationship of molten CaO–MgO–SiO₂–FeO–P₂O₅ slags
C. LUI, R. ZHENG, Y. MENDZ, Z. WANG, S. JIAO, J. JIA and Y. JIN

Instrumentation, Control and System Engineering
2773 Jointly class-specific and shared discriminative dictionary learning for classifying surface defects of steel sheet
B. ZHOU, H. LI, K. CU and Z. MAO
2785 Prediction method of core dead stock column temperature based on PCA and ridge regression
W. WANG, X. ZHANG, K. LU, B. DAI, J. ZHANG, P. CHEN and B. WANG

Steelmaking
2792 Residual stress control in drawn bar and wire by heating-cooling-drawing process
H. KUBOTA, Y. AKIMOTO, K. SAIKI, W. SAKURAZAWA and K. YOSHIDA

Surface Treatment and Corrosion
2798 Novel solid carburizing method for steel using a mixture of iron and graphite powders
Y. MORIZONO, T. YAMAMURO and S. TSUREKAWA
2805 Effect of sputtered Fe on the plasma nitriding mechanism of AISI H13 tool steel using electron-beam-excited plasma
J. MIYAMOTO, T. KONDO and M. HAGIWO

Transformations and Microstructures
2813 In-situ observation of abnormal grain growth of austenite in case hardening steel
Y. IMAHARA, T. ISHIMOTO and K. NISHIMURA
2822 TTP diagrams of graphitization of creep ruptured carbon steels and 0.5Mn steel
T. HAYAKAWA, K. SAITOU, K. SEIKIDO, H. HAYA and K. KASAHARA

Mechanical Properties
2832 Three-body-type abrasive wear behavior of multi-alloyed white cast iron with different carbon contents used for hot work rolls
S. INTHIDECH, J. OPAPAIBOON, K. YAMAMOTO and Y. MATSUBARA
2844 Strength and ductility balance of a Ti-5Al-2Sn-2Zr-4Cr-4Mo (Ti-17) alloy with various microstructures: Experiment and machine learning
H. MATSUMOTO, D. TADOKORO and I. SÉCHEPÉE

Social and Environmental Engineering
2855 Effect of supersaturated solid solution of oxygen in old Japanese nails “Wakugi” on the fine structure of rust
K. NAGATA, Y. FURUKAWA and T. YAMASHITA

A-28 Abstracts of the papers published in Tetsu-to-Hagané Vol. 107 (2021), No. 11
