Fundamentals of High Temperature Processes

Effect of rare earth Ce on the morphology and distribution of \( \text{Al}_2\text{O}_3 \) inclusions in high strength IF steel containing phosphorus during continuous casting and rolling process

H. WANG, Y.-p. BAO, J.-g. ZHI, C.-y. DUAN, S. GAO and M. WANG

Effect of molybdenum layer formed at the inner surface in Mo/MoO\(_2\)-type zirconia oxygen sensor on continuous measurement of oxygen content in molten steel

N. SAEKI, M. SUZUKI, M. NAKAMOTO, T. TANAKA, K. KATOGI, H. KOSAKA, K. DOZONO and R. ISHII

Negatively catalyzed gasification characteristics of metallurgical coke and its implication for ironmaking process

M. SUN, J. ZHANG, K. LI, Z. WANG, C. JIANG and H. LI

Composition dependence of normal spectral emissivity of liquid Ni–Al alloys

M. ADACHI, Y. YAMAGATA, M. WATANABE, S. HAMAYA, M. OHTSUKA and H. FUKUYAMA

Separation of vanadium and titanium phase from the vanadium slag system utilizing supergravity

W. HUANG and Y. LIU

Reevaluation and measurements of \( \text{Fe}^{x}\text{O} \) activities in \( \text{Fe}^{x}\text{O}–\text{CaO}–\text{SiO}_2 \) pseudo-ternary system at 1,573 K

K. SAITO, Y. OSHIMA and M. HASEGAWA

Numerical study into gravity separation of phosphorus from BOS slag during solidification

T. B. T. NGUYEN, S. MITRA, G. EVANS, B. J. MONAGHAN, P. ZULLI, K.-o. JANG, D. O’DEA and T. HONEYANDS

Composition change of inclusions in high carbon steel before and after addition of aluminum

A. HARADA, A. MATSUI and S. NABESHIMA

Viscosity-structure relationship of CaO–Al\(_2\)O\(_3\)–FetO–SiO\(_2\)–MgO Ruhrstahl-Heraeus (RH) re refining slags

T. S. KIM and J. H. PARK

Dephosphorization kinetics of bloated metal droplets reacting with basic slag containing TiO\(_2\)

P. B. DRAIN, K. GU, N. DOGAN, R. J. LONGBOTTOM, M. W. CHAPMAN, B. J. MONAGHAN and K. S. COLEY

Reaction behavior of SiC with CaO–SiO\(_2\)–Al\(_2\)O\(_3\) slag

Y. HOU, G.-H. ZHANG and K.-C. CHOU

In-situ observation on the agglomeration and dispersion of particles at the interface of high-temperature melts

Y. LI, L. WANG, J. LI, S. YANG, C. CHEN, C. LI and X. LI

Control of zinc-containing dust agglomerates in basic oxygen furnace flue gas cleaning system

X. LI, P. TANG, J. JIANG, Q. FU and G. WEN

Ironmaking

Positive catalytic effect and mechanism of iron on the gasification reactivity of coke using thermogravimetry and density functional theory

Z. WANG, K. PANG, K. LI, J. ZHANG, M. SUN, B. HAN, C. JIANG and H. LI

Model study of centre coke charging in blast furnace through DEM simulations

A. CHAKRABARTY, S. BASU, S. NAG, U. GHOSH and M. PATRA

Steelmaking

Optimization of the structure and injection position of top submerged lance in hot metal ladle

X. WANG, S. ZHENG and M. ZHU

Casting and Solidification

Numerical simulation of flow, heat, solidification, solute transfer and electromagnetic field for vertical mold and curved mold of billet

Y. LI, Y. SUN and X. BAI

Effects of substituting SiO\(_2\) with oxidisers on the reaction performance and physical properties of mould flux for high Ti-bearing steel

Z. CHEN, W. DU, M. ZHANG, Q. WANG and S. HE

Prediction of spatial composition distribution of inclusions in the continuous casting bloom of a bearing steel under unsteady casting

J. WANG, L. ZHANG, Y. ZHANG, G. CHENG, Y. WANG, Y. REN and W. YANG

Identification of cracking issues and process improvements through plant monitoring and numerical modelling of secondary cooling during continuous casting of HSLA steels

R. M. PINEDA HUITRON, P. E. RAMIREZ LOPEZ, E. VUORINEN, P. NAZEM JALALI and M. KÄRKKÄINEN

Influence of superheat on macrosegregation in continuously cast steel billet from statistical maximum viewpoint

D. GUO, Z. HOU, Z. PENG, Q. LIU, Y. CHANG and J. CAO

Mathematical modeling on transient multiphase flow and slag entrainment in continuously casting mold with double-ruler EMBr through LES+VOF+DPM method

Y. YIN and J. ZHANG

Application of heat absorption method to improve quality of large steel ingot

C. LI, Q. ZHANG, L. ZHU, W. XUAN, J. WANG, Q. ZHOU and Z. REN

Instrumentation, Control and System Engineering

Jet quenching simulation with consideration for distribution of heat transfer coefficient and latent heat for martensitic transformation under rapid cooling

H. TAKEUCHI and Y. YOGO

Chemical and Physical Analysis

Early precipitation stages of sigma phase in alloy 28 studied with scanning electron microscopy and atom probe tomography

C.-O. A. OLSSON, M. HÄTTESTRAND, H. MAGNUSSON, D. SHINDE and M. THUVANDER

(Continued on inside backcover)
