CONTENTS

Review Articles

Fundamentals of High Temperature Processes
1561 Comparison of oxidation behavior of various reactive elements in alloys during electroslag remelting (ESR) process: An overview
S. C. DUAN and J. H. PARK

1573 Role of interfacial properties in the evolution of non-metallic inclusions in liquid steel
L. ZHENG, A. MALFLIET, B. YAN, Z. JIANG, B. BLANPAIN and M. GUO

Regular Articles

Fundamentals of High Temperature Processes
1586 Analysis of dephosphorization thermodynamics based on the melt structure of CaO–SiO$_2$–FeO–MgO system
R. ZHANG, J. JIA, S. LI, Y. ZHANG, L. JING, Y. MIN and C. LIU

1595 Flow and heat transfer characteristics of melt droplet with non-uniform heating temperature
J.-m. WANG, X. CHEN, L.-x. HAN, K. JIAO, Y.-x. WU and Z.-m. ZHENG

Ironmaking
1607 Mechanism of carbothermic reduction of Fe$_2$O$_3$ irradiated by microwave with 2.45 GHz
K. NAGATA and K. KODAMA

1618 Exploring the composition and structure of triclinic SFCA-I
N. A. S. WEBSTER, M. I. POWNCEBY and N. C. WILSON

1624 In-situ X-ray diffraction analysis of phase formation during heating of silico-ferrite of calcium (SFC) compositions
N. A. S. WEBSTER and M. I. POWNCEBY

1629 Preparation of formed coke from biomass by sequence of torrefaction, binderless hot briquetting and carbonization

Steelmaking
1639 Intelligent case-based hybrid model for process and endpoint prediction of converter via data mining technique
S.-y. SONG, J. LI and W. YAN

Casting and Solidification
1649 Analysis of slag-steel reactive of fluorine-free mold fluxes used for 3.52% Al-TRIP steel
M. LIAO, J. LIU, H. ZHU, Z. WANG and H. CUI

1657 Comprehensive understanding of the role of carbon black in the sintering and melting behavior of mold flux
F. HAN, L. YU, G. WEN, Y. LIU, L. ZHIANG and S. GU

1666 Application of heat transfer coefficient estimation using data assimilation and a 1-D solidification model to 3-D solidification simulation
T. OKAWA, Y. NATSUME and M. OHNO

1674 A high-efficiency virtual submesh cellular automata method for solidification simulation with low mesh anisotropy
L. SHI, S. XIU, H. LUI, C. CHEN, S. SHUIAI, T. HU, A. KAO, J. WANG and Z. REN

Instrumentation, Control and System Engineering
1684 Whale optimization end-point control model for 260 tons BOF steelmaking
M. WANG, C. GAO, X. AI, B. ZHAI and S. LI

1694 Evaluation of deep network-based methods for crack detection of iron ore green pellet
S. ZHOU, X. LIU, Y. CHEN and X. SUN

Chemical and Physical Analysis
1705 Simultaneous analysis of soluble and insoluble oxygen contents in Al-killed steels of various C contents and supersaturation phenomena in the steel

Welding and Joining
1715 A sound dissimilar AA5052/S45C joint formed by uniform and simultaneous deformation of both materials using pressure-controlled joule heat forge welding
Y. LIM, Y. MORISADA, H. LIU and H. FUJII

1725 Modelling of nitride precipitation during isothermal heating after rapidly cooled from high temperature in duplex stainless steel
K. OGAWA, K. YAMADA and A. SEKI

Surface Treatment and Corrosion
1731 Mechanism and suppression method of hydrogen entry into steel by blasting
M. KAWAMORI, F. YUSE, F. FUJITA and H. IKEGAMI

Mechanical Properties
1741 Comparative study of shear fracture between Fe-based amorphous and ultrafine-grained alloys using micro-tensile testing
Y. TAMPA, K. TAKAGI, S. UEKI, M. OHTA, Y. MINE and K. TAKASHIMA

A-16 Abstracts of the papers published in Tetsu-to-Hagané Vol. 108 (2022), No. 8

Announcements from ISIJ

Price of ISIJ International
Vol. 62 (2022), Nos. 1 to 12 for Overseas

Price: ¥3,810 (日本 4,191円(税込)/冊)
Annual subscription fee (additional subscription for members): ¥4,727/year (日本 5,200円(税込)/年)

Airmail Service:
Asia ¥9,000/year
Other Areas ¥12,000~15,000/year
