Regular Articles

Fundamentals of High Temperature Processes
1751 Effect of the partial equilibrium state at the zirconia surface in a CrCr₂O₃-type zirconia oxygen sensor on continuous measurement of the oxygen content in molten steel
N. SAeki, M. NAKAMOTO and T. TANAKA

1760 Boron-iron separation and boron enrichment from boron-bearing iron concentrate at low-temperature enhanced by supergravity
Y. HINO, J. GAO, X. LAN and Z. GUO

1768 Quantification of resistance and pressure drop at high temperature for various suction pressures during iron ore sintering
T. SINGH, S. MITRA, D. O’DEA, L. KNUEFING and T. HONEYANDS

Ironmaking
1777 Effect of top gas recycling technology on the softening, melting and dropping behavior of V–Ti bearing burden in COREX process
C. YIN, S. ZHANG, Y. GUO, L. WEN and C. BAI

1785 Effect of 2CaO·SiO₂ addition on reaction behavior of iron ore sinters
M. HAYASHI, D. ZHOU, Y. IWAMI, T. HIGUCHI, T. WATANABE, R. ENDO and M. SUSSA

1792 Effect of magnetite concentrate particle size on pellet oxidation roasting process and compressive strength
H. ZHANG, K. BAI, W. LIU, Y. CHEN, Y. YUAN, H. ZOO and J. WANG

1802 Microstructure Ti–Fe phase separation mechanism in the direct reduction process of titanomagnetite with coal by microwave heating
P. LIU, S. GONG, C. YUWEN, B. LIU, L. ZHANG and A. MA

Ironmaking
1777 Effect of top gas recycling technology on the softening, melting and dropping behavior of V–Ti bearing burden in COREX process
C. YIN, S. ZHANG, Y. GUO, L. WEN and C. BAI

1785 Effect of 2CaO·SiO₂ addition on reaction behavior of iron ore sinters
M. HAYASHI, D. ZHOU, Y. IWAMI, T. HIGUCHI, T. WATANABE, R. ENDO and M. SUSSA

1792 Effect of magnetite concentrate particle size on pellet oxidation roasting process and compressive strength
H. ZHANG, K. BAI, W. LIU, Y. CHEN, Y. YUAN, H. ZOO and J. WANG

1802 Microstructure Ti–Fe phase separation mechanism in the direct reduction process of titanomagnetite with coal by microwave heating
P. LIU, S. GONG, C. YUWEN, B. LIU, L. ZHANG and A. MA

1816 Thermodynamic analysis of the reduction of vanadium-titanium magnetite by gasification gas
W. CHEN, Z. DONG and X. WANG

1827 In situ compressive strength of iron coke in high-temperature carbonization
W. LV, F. CHEN, Z. LIU, J. BAO, Z. LIU, M. CHU and X. LV

Steelmaking
1836 Effects of particle size distribution of MgO and carbon on MgO–C reaction behaviour
E. YAO and K. TAKAHASHI

1845 Optimization of endpoint control for low carbon and phosphorus steel produced by converter single slag process
L. CHANGHAI, L. JING, Y. WEI and Z. HONGJUN

1852 Effect of cerium and magnesium addition on evolution and particle size of inclusions in Al-killed molten steel
Y. WANG and C. LIU

Casting and Solidification
1862 Numerical simulation of macrosegregation in a continuous casting mold with electromagnetic stirring
K. KIHARA, N. OKADA, S. SAITO and K. KAWASHIMA

Instrumentation, Control and System Engineering
1874 Quantum optimization with Lagrangian decomposition for multiple-process scheduling in steel manufacturing
K. YONAGA, M. MIYAMA, M. OHZEKI, K. HIRANO, H. KOAYASHI and T. KOYOKAWA

Chemical and Physical Analysis
1881 Characterization of α-Al₂O₃ in structural isomers of alumina formed by oxidation of Fe–Cr–Al alloys
S. IMASHUKU, M. FUKUMOTO, K. NAKAJIMA and S. SUZUKI

Welding and Joining
1887 Acidic corrosion behavior of slag-free self-shielded flux-cored arc welding overlay
D. LIU, P. WEI, W. LONG, Y. WU and R. WANG

1896 Analysis of process signals of resistance spot welding for DP590 steel using numerical calculation
K. ZHOU, G. WANG, W. LU, H. LI and M. IVANOVA

1908 Effects of carbon content and austenite grain size on retained austenite fraction in stir zone of friction stir welded 6%Ni carbon steels
T. MIURA, H. FUJII and K. USHIYODA

Surface Treatment and Corrosion
1918 Synergistic effect of brightener and solution temperature on the electrodeposition behavior of Zn–Ni alloy from alkaline zincate solution
S. H. BAE, S. OUE, Y.-K. TANINOUCHI, I. SON and H. NAKANO

1930 Visualization of coupling current and immersion potential of iron surface corroding beneath the ice in the temperature cycling under the freezing point
K. AZUMI and T. NISHIOKA

1937 Evaluation of corrosion progress using multichannel iron wire electrodes embedded in a cement test block
K. AZUMI, S. SAITO and K. ISHIDA

(Continued on inside backcover)
