PEREGRINATIONS

Isaac Kaplan

In order to promote surgery with the CO2 laser,
And in the hope of becoming a real trail blazer,
After setting up a training center at home,
All over the world, I started to roam.
Since, to spread the gospel I intended,
Over a hundred cities I attended.
Fourteen in the USA,
And four in the UK
In Germany there were also four,
And, in South Africa, even more.
There were two in Turkey and two in Taiwan,
But in Cyprus, Egypt and Kenya, only one
There were four in Australia and five in Spain,
And in New Zealand, Poland and Russia, two again.
In Thailand, Japan and China, there were three,
As well as Belgium, France, Austria and Sicily.
There were five in Italy and India too,
And one in Greece, Norway, Ireland and Peru.
The same for Portugal, Mexico, Cuba and Kazakhstan,
But two in Sweden, Korea, Colombia and Uzbekistan.
There were three in Brazil, Argentina and Canada once more,
But one in Paraguay, Switzerland, Hungary and Singapore.
In Vietnam, Venezuela and Denmark there were two,
And with Hong Kong, you can see what I managed to do
Now, since on promoting laser surgery I was bent,
I met with surgeons of all specialties wherever I went.
My peregrinations were not in vain,
Because to most places I was invited to return again,
And in most countries societies we founded,
Which proves that laser surgery abounded.
