Erratum

The sentences in the original version in the page 2, line 3–8 of the 2nd paragraph in the right column are read: “Watanabe hyperlipidemic rabbits develop atherosclerosis after months of treatment with high fat-diet. When 1% probucol was administrated to Watanabe rabbits with their high-fat diets for about 20 months, atherosclerostic lesions were significantly reduced [18, 19].” The correct version reads: “Watanabe hyperlipidemic rabbits develop atherosclerosis spontaneously under normal chow diet. When 1% probucol was administrated to Watanabe rabbits for 6 or 20 months, atherosclerostic lesions were significantly reduced [18, 19].”
