Journal of Japan Industrial Management Association

Vol. 56 No. 2 2005

CONTENTS

Methodology
A Study on the Strategies for Production Affected by Seasonal Demand

.......................... Shoichi SATO, Mitsuyoshi HORIKAWA, Takashi KANAZAWA and Mitsumasa SUGAWARA 65

Multiple Objective Genetic Algorithms Approach to a Cardboard Box Production
Scheduling Problem .................................. Hidetaka MISAWA and Masakazu KANEZASHI 74

Generalized Kanban-Loops for Multi-stage Manufacturing Processes

.............................. Aya ISHIGAKI and Yasuhiro HIRAKAWA 84

A Method for Generating a Robust Set of Approximate Nondominated Solutions under Scenarios ....... Masahide KAWASAKI, Kazuko MORIZAWA and Hiroyuki NAGASAWA 92

System Availability Analysis with Two Failure Modes of Random Failure and Wear-out Failure

.......................... Kayoko TAKAMORI, Ippei NAKASE, Yasuhiro TAKEMOTO and Ikuo ARIZONO 101

Nurse Scheduling System in Consideration of Versatility

.............................. Kenji KURASHIGE, Toshio HASHIMOTO and Yoshimasa KAMEYAMA 109

The Estimation of Halo Error Using Second-Order Factor Analysis

.............................. Sadahito ISHIBASHI 121

Implementation and Application of Logistic-Regression-Based MSQIM
—Quality Data Mining through the Multi-Stage Quality Information Model (MSQIM) (1st Report)—

.............................. Hajime MIZUYAMA, Katsunobu ASADA and Kentaro YAMADA 129

Case Study
Progressive-Curve-Based Control of Inventory Fluctuation under On-Demand SCM

.............................. Masayuki MATSUI, Hiroki UCHIYAMA and Hiroaki FUJIKAWA 139

Memorandum .................................................. 146
