THE JOURNAL OF
JAPAN INSTITUTE OF NAVIGATION

MARCH 2004 VOL.110

CONTENTS

1. Multiple Ship Clusters Behavior Simulation
   ........................... Masaaki INAISHI, Hayato KONDO and Akira KAWAGUCHI( 1)

2. Finding the Shortest Course of a Ship Based on Reinforcement Learning Algorithm
   ............................ Kunihiro MITSUBORI, Takeshi KAMIO and Takahiro TANAKA( 9)

3. Risk Control of Marine Traffic Accident in the Strait of Istanbul
   – Management Criteria for Encountering in Confined Water Area –
   ............................................................... Kinzo INOUE and Cemil YURTOREN( 19)

   Wind and Wave Conditions on Simulated Ship's Routes
   .............................................................. Mitsuru HAYASHI and Hiroshi ISHIDA( 27)

5. Models for the Along-Track Prediction Errors of an Automatic Dependent Surveillance System
   ................. Takahiro KODO, Sakae NAGAOKA, Osamu AMAI and Hideo NAKAMURA( 37)

6. Network-Based RTK-GPS Positioning via Geostationary Satellite Communication Line
   ............................. Fan CHUNMING, Hiromune NAMIE, Osamu OKAMOTO, Shinji TANAKA,
   Nobuaki KUBO and Akio YASUDA( 45)

7. A Rescue System for Man-Overboard – III,
   – A Fusion of the Rescue System and the Monitoring System –
   .................. Masaaki WADA, Kiyoshi AMAGAI, Nobuo KIMURA and Toshihiro IWAMORI( 51)

8. Study on Speech Recognition in Bridge Operation Support System
   ................................................................. Kazuo MATSUDA and Sueharu MIYAHARA( 59)

9. Phenomena and Factors of Port Disturbances by Long-period Waves at Kumaishi Fishing Port
   .............................................................. Naoya ABESIMA, Kiyoshi AMAGAI, Nobuo KIMURA,
   Shigeyoshi KODAMA and Hiroki ISHIMURA( 65)

10. A Study of the Primitive Requirement of the Agent Rule Based on Results of Information
    Access by the Officer of Watch
    ........................................................................... Kouhei HIRONO( 75)
11. Extension of the m-SHEL Model for Analysis of Human Factors at Ship Operation
       Hiroko ITOH, Nobuo MITOMO, Takeshi MATSUOKA and Youji MUROHARA( 83)

12. Human Adaptation to Characteristic of Ship Motion (Time Lag System)
       Hiroyuki SHIMADA, Eiichi KOBAYASHI, Takashi ISOGAI, Kinzo INOUE,
       Naoto HOSOI, Noriaki TSUTSUMI and Masao FURUSHO( 93)

13. A Quantitative Rating Method of Self-completion Ability at Casualty Ships and the Present
      Characteristics from the Results by Time Series Analysis in the Latter Half of the 20th Century
       Tsukasa NAGAHATA(101)

14. Incidental Situation of Human Error Occurred in Marine Collision Accidents
       Takahiro TAKEMOTO, Yoshiharu SAKAMOTO, Masao FURUSHO and
       Hiroyuki SHIMADA(109)

15. Measurements of Navigation Times under Tidal Currents and Leeway by
      Wind Effects for Real Small Vessel
       Shigeaki SHIOTANI(117)

16. Measurement and Quantitative Evaluation of Veteran Seaman's Skill to Work a "Ro",
      Japanese Style Scull, Fitted in a Wooden "Wasen", Existing in Ama Village, Nagasaki-City
       Hisaaki TAKAYAMA, Ken-ichi SHIMIZU, Nobuhiro YAMAWAKI and Masaji GODA(125)

17. Basic Research on Safety Management of Ferry Cargo Under Rough Weather Conditions
       Go KOBAYASHI, Masayoshi KUBO, Shinji MIZUI and Kenji SASA(135)

18. A Study on Detecting the Risk of Dragging Anchor
       Kinzo INOUE, Hideo USUI and Fumiko SHINAGAWA(143)

19. Prevention of the Sweat Damage to the Cargos in Containers — II,
       Effect of the Physical Adsorption Type Silica Gels
       Masaaki SATO, Tadashi MATSUMOTO and Sachiko TSUMURA(149)

20. Estimation of Health Condition of Chemical Tanker Crews Transporting Non-Carcinogens
       Takahiro MAJIMA, Katsuji YAMAGUCHI, Kiyoshi SHIBATA and Masashi GAMO(157)

21. Effect of Compressive Loading on Dissociation of Methane Hydrate Pellets
       Kenjiro HIKIDA, Toru IWASAKI and Susumu OTA(165)
