THE JOURNAL OF
JAPAN INSTITUTE OF NAVIGATION

MARCH 2006 VOL.114

CONTENTS

1. A Basic Study on Ship Navigation near Cape
   .................................................. Go KOBAYASHI, Masayoshi KUBO, Ik-Soon CHO, Shinji MIZUI and Kenji SASA (1)

2. Simulation of Merging and Separation of Ship Clusters Using a Ship Cluster Behavior Model
   .............................................. Masaaki INAISHI, Hayato KONDO, Masaki KONDO and Akira KAWAGUCHI (9)

3. About PAD and Their Tracks
   ........................................................................................................................................... Yang ZENG and Hayama IMAZU (17)

4. Correlation between Unsafe Ship-handling Situation and Marine Accidents at the Kurushima Strait
   .................................................. Masaru YASUDA, Yoshitaka FUKUO, Kinzo INOUE and Hideo USUI (25)

5. Analysis on Ship's Accidents Caused by Dozing Watch-keepers in Judgment Record of Marine Accidents Inquiry Agency Judgments
   ................................................................................................................................. Shinsuke URUSHIDANI, Yuji SANO, and Sonoe MURAMATSU (31)

6. Research on the Collision of the Working Vessel "38th Kinryu Maru" and the Cargo Vessel "New Mitsu"
   ............................................................... Masafumi KIMURA, Saburo SUZUKI and Masayoshi KUBO (39)

7. Study on Safety Evaluation of the Collision Avoidance Support System
   ........................................................................................................................................ Nobuo ARIMURA and Kunihiko TANAKA (47)

8. Research on Relationship between Residual Environmental Stress and Latent Environmental Stress—III.
   — On the Relationship in Congested Traffic —
   .............................................................. Hongbin XIE, Kinzo INOUE, Hideo USUI and Wataru SERA (59)

9. Detection Method of Moving Ships through a Navigational Image Sequence taken by Multi-sensor
   ............................................................................................................................... Masatoshi SHIMPO, Masato HIRASAWA and Masaki OSHIMA (65)

10. Improvement of Search Procedure for Course Line Generation System using Course Line Parts
    ................................................................. Yoshihiro ISHI, Nobukazu WAKABAYASHI and Youhei TAMURA (73)

    — Consideration by GL-DE Mixed Distribution Model —
    ................................................................................................................................. Sakaé NAGAOKA (81)

12. Comparison of Computation of Horizontal Overlap Probability in Aircraft's Collision Risk Estimation on Crossing Routes
    ........................................................................................................ Masato FUJITA, Sakaé NAGAOKA and Osamu AMAI (89)
13. Reduction of Aircraft Passing Frequencies by Traffic Flow Division
   Osamu AMAI and Sakae NAGAOKA (97)

14. Human Adaptation to Characteristic of Planer Motion with Time Lag
   Yongjian MI, Noriaki TSUTSUMI, Hiroyuki SHIMADA, Kinzo INOUE,
   Eiichi KOBAYASHI, Masao FURUSO and Youhei KAIEDA (103)

15. Advanced Numerical Design Method on Fendering System for Offshore Ship-to-Ship Transfer
   Operation
   Shigeki SAKAKIBARA, Masashi WAKABAYASHI and Shuu YAMADA (109)

16. A Yawing Movement under Dragging Anchor and Detection of Dragging Anchor in Real Ship
   Yoshiji YANO and Nobukazu WAKABAYASHI (119)

17. A Study of Operational Troubles Due to Ship Motions in the Seto Inland Sea
   Kenji SASA and Shinji MIZUI (127)

18. Numerical Calculation of Concentration in the Hydraulics Model Tank of Ballast Water Exchange
   by Pumping-Through Method
   Shigeaki SHIOTANI, Koichi KAMATA, Kiyokazu MINAMI and Kuniaki SHOJI (135)

19. A Study on Mathematical Maneuvering Model to Solve Minimum Time Approaching Problems
   Tadatsugi OKAZAKI and Kohei OHTSU (141)

20. Time Series Analysis of Non-stationary Ship Motion Data—II.
   Instantaneous Cross-spectral Analysis of Vector-valued Time-history Data
   Toshio ISEKI (151)

21. A Basic Study on Evacuation Maneuver from Tsunami Attack
   Eiichi KOBAYASHI, Masayoshi KUBO, Syunichio KOSHIMURA and Saburo SUZUKI (157)

22. A Theoretical Study of the Draft Reading Device
   Kouhei HIRONO, Wataru SERA, Masaki FUCHI and Kinzo INOUE (165)

23. A Utilitarian Type of Horizontal Stabilizing Platform
   Verification of the Ship Motion Reduction Effect by the Preproduction Simulation of Ship
   Motion in Wave
   Masato SUZUKI and Kiyokazu MINAMI and Kohei OHTSU (171)

24. An Ergonomic Analysis on Shiun Maru and Ukou Maru No.3 Casualty
   The Use of “The Human Accidents Investigation Manual” of Japan Ergonomic Society
   Shuji HISAMUNE, Kiyoshi AMAGAI and Nobuo KIMURA (179)

25. Analysis of Maritime Casualties around Japan Related to Weather and Sea States—II.
   Characteristics in Sea Areas
   Chiharu MORIWAKI, Mitsuru HAYASHI, and Hiroshi ISHIDA (185)

26. An Analysis on Trucks’ Use of Ferry Lines under Cutting the Toll of the Connection Bridges
   between Honshu and Shikoku Regions
   Masato OKAYAMA (191)

27. Experimental Investigation on Vibration of Package with Gap
   Kazuki TSUDA, Takamasa NAKAJIMA and Katsuhiko SAIITO (201)

28. A Study on the Relation between Health Practices and Mental Health in Seamen
   Kazuhiko KATO (209)
29. An Attempt to Improve Lumbodorsal Complaint in Seamen
       ........................................ Miho EHARA, Yuji SANO, Mitsuhiro TAKAHARA and Kenji CHONAN......(217)

30. The Gap Analysis of the Expectation for Seafarers' Competence in Maritime Company
       .......................................... Ninger SONG, Kinzo INOUE and Hideo USUI......(223)

31. What is the Seamanship Imaged by the Cadets?
    —Capturing Its Meaning Structure and Extracting Components of Character Education—
       ......................................................................... Namiko MORISHITA......(229)

32. Investigation and Analysis of the Maritime Casualties Occurred in the Pacific Side of the
    Central American Region between 1980 and 2004
       ............................................................ Oscar Porras ROJAS, Hayama IMAZU and Takahiko FUJISAKA......(235)

33. Constructing shipboard LAN system using wireless LAN technology and its Application to the
    ship monitoring system
       ............................................................ Takashi MIWA, Nobukazu WAKABAYASHI, Yoshiji YANO......(243)

34. Study of Estimating Shape by Integrating Radar Images
       ............................................................ Junya ISHIWATA Takahiko FUJISAKA and Hayama IMAZU......(251)

35. Practicability of High-Accuracy Point Positioning
       ............................................................ Nobuaki KUBO, Un KYO and Akio YASUDA......(259)

36. Effect of Reduced Lateral Separation in the Oceanic Route
       .................................................................................................................. Yutaka FUKUDA......(267)

37. Study on Applications to the Vessels of High Frequency Direction Finding System by MUSIC
    Algorithm
       .................................................. Kiminobu KUMADA and Akira TSUTSUMI, Toshio HIROSE and Katsusi MIWA......(275)

38. Experimental Evaluation of Maritime Position Communication System Synchronized by PPS
    Signal of a GPS Receiver
       ........................................... Masashi YOSHIDA, Harumasa HOJO, Fan CHUNMING and Akio YASUDA......(285)
