THE JOURNAL OF
JAPAN INSTITUTE OF NAVIGATION

SEPTEMBER 2006 VOL.115

CONTENTS

1. Study on Precise Prediction of Ship's Position Using EKF
   .......................................................... Yuji OCHI AI, Tadatsugi OKAZAKI and Kohei OHTSU ..... (1)

2. Marine Traffic Simulation Using Ship Agent Clusters
   —Northbound Traffic in Tokyo Bay—
   ........................................... Masaaki INAISHI, Hayato KONDO, Masaki KONDO and Akira KAWAGUCHI ..... (11)

3. Effects of a New Navigation Support Display on Human Performance
   ........................................... Qiao LIU, Tadatsugi OKAZAKI, Egil PEDERSEN and Junji FUKUTO ..... (17)

   .................................................. Oscar PORRAS ROJAS, Hayama IMAZU and Takahiro FUJISAKA ..... (25)

5. A Study on the Supporting Information in Approaching Maneuver under Wind Effect
   ........................................... Daichi HARA, Kinzo INOUE, Young-Soo PARK and Minako SAKURAI ..... (31)

6. A Study on the Arrangement of Bridge Pier from a Viewpoint of Ship Handling Difficulty
   ............................................... Kenji MASUDA, Kinzo INOUE, Hideo USUI, Kouhei HIRONO and Wataru SERA ..... (39)

7. Real-time Analysis of Marine Traffic with AIS
   —Evaluation of Ship-handling Difficulty by Environmental Stress Model—
   .................................................. Hiroaki SETA, Osamu SUZUKI, Koichi KAMADA and Hiroshi AMANO ..... (45)

8. Estimation of Ship's Course for Sailing on Route by Navigation Simulation in Coastal Water
   ........................................... Haibo XIA, Shigeaki SHIOTANI, Eiichi KOBAYASHI and Nobukazu WAKABAYASHI ..... (51)

9. Analysis of Radar Echoes of the Overhead Power Line and the Small Boat at Kurushima Kaikyou
   ............................................... Tatsuto YAMADA, Sinji MIZUI, Naoto SATOU and Yasuo TAKENAKA ..... (59)

    ........................................... Masatoshi SHIMPO, Keiichi ISHIDA, Masato HIRASAWA and Masaki OSHIMA ..... (67)

11. Study of Estimating Shape by Integrating Radar Images
    —Integration Experiment by Use of Multi-Radar—
    ............................................... Junya ISHIWATA Takahiko FUJISAKA and Hayama IMAZU ..... (75)

12. Applying an Information Technology in Fishing Industry—II.
    —Data Analysis and Production of Bathymetric Chart—
    .................................................. Masaaki WADA, Katsumori HATANAKA and Masami SHIZUKUISHI ..... (83)
Masato SUZUKI, Kohei OHTSU and Yasuhiko URA (91)

14. A Study on Mode/Route Choice of Non-Unit-Load Ship for ModalShift  
Toshikazu MATSUO and Kenichiro NAGAIWA (99)

15. Investigations into the Actual Utilization of Multi-user Container Terminals  
Etsuko NISHIMURA, Akio IMAI and Sen LUAN (107)

16. Evaluation of Veteran Seaman's Skill of Working a "Ro-scull" to Propel Japanese Traditional  
"Wasen-boat"—IV.  
——Production of Three-component Force Sensor Measuring the Force at Scull Lock and  
Evaluation of Sculler's Skill from the Output of the Sensor—  
Ken-ichi SHIMIZU, Hisaaki TAKAYAMA, Masaji GODA and Nobuhiro YAMAWAKI (115)

17. Agent-Oriented Evolutionary Control Systems  
—Determining the Optimal Control Codes for "Ro", the OrientalOar—  
Rogério NEVES and Tsugukiyoshi HIRAYAMA (123)

18. On the Approach Maneuvering Booklet for Small Domestic Cargo Ships  
Hitot TAMARU, Hideo YABUKI, Tran Viet HUNG and Ruri SHOJI (133)

19. An Empirical Study on Seafarers of Work Improvements for Safety  
Shuji HISAMUNE, Shinpei FUJIE, Kazuki NODA and Nobuo KIMURA (141)

20. Analysing Navigators' Eye Movements by Utilizing Eye Mark Recorder on the Ship Handling  
Simulator  
Serdar KUM, Masao FURUSHO and Özcen ARSLAN (147)

21. Trend of the RA Report Based on the Principal Component Analysis in the Transition Period of  
ACAS Algorithm Versions  
Yasuto SUMIYA, Shigeru OZEKI and Masayuki SHIRAKAWA (153)

22. The Improved Success Rate of Integer Ambiguity Resolution Using Many Navigation  
Satellites in Carrier-phase Positioning  
Kentaro KONDO and Akio YASUDA (163)

23. Analysis of Maritime Casualties around Japan Related to Weather and Sea States—III.  
—Quantitative analysis of characteristics in Sea Areas—  
Chiharu MORIWAKI, Mitsuru HAYASHI, and Hiroshi ISHIDA (169)

24. Basic Study on Hazard Evacuation Chart of Tsunami at Large-scale Earthquake  
Mitsuru HAYASHI, Masayoshi KUBO Eiichi KOBAYASHI and Kenji ISHIDA (177)

25. Meteorological Analysis of the Maritime Casualty of Kaiwo Maru Caused by Typhoon 0423  
Tsutomu FUJII, Teruo OHSAWA and Hiroshi ISHIDA (183)
