THE JOURNAL OF
JAPAN INSTITUTE OF NAVIGATION

SEPTEMBER 2008 VOL.119

CONTENTS

1. A New Approach to Automatic Radar Tracking with and without Supplementing AIS Data in Tokyo Bay
   NGUYEN Minh Duc and TAMARU Hitoi (1)

2. A Study on a Dynamic Traffic Management System based on Virtual and Synthetic AtoN AIS System
   El Hocine TASSEDA and Hitoi TAMARU (9)

3. The Design and Implementation of a Weather Routing Data Management System based on OPeNDAP Protocol
   Takeshi YOKOI, Hitoi TAMARU and Kyoko TAKASHIMA (19)

4. Development of Marine Traffic Observation Method with AIS and ARPA Information
   Hiroaki SETA, Osamu SUZUKI, Shuji SUZUKI and Hiroshi AMANO (27)

5. Development of the Marine Master Automatic Synchronization Clock for Radio Controlled Clock onboard.
   Takaki OHNISHI, Osamu SUZUKI, Katsuhiro YAMASHITA and Toshio MIYOSHI (35)

6. Ship Cluster Behavior Model with Strategic and Tactical Obstacle Avoidance
   Pan Mingyang, Masaaki Inaishi and Akira Kawaguchi (43)

7. The Basic Study on Evaluation of Stownet Fishery Environment and Vessel's Navigational Environment in the Bisan-seto Sea Area
   Masatoshi SAKAIDE, Kinzo INOUE, Wataru SERA and Kojiro MOTOMURA (51)

8. Comparative Evaluation of Ship-handling Difficulty at Daytime and Nighttime in the Straight Channel
   Xianghui XING, Kinzo INOUE, Hideo USUI and Wataru SERA (59)

   Misako URAKAMI, Yasuyuki NIWA, Hisaya MOTOGI and Hiroshi MATSUNO (67)

10. Proposal of Target Data Display Notation on Navigation Systems
    Nobukazu WAKABAYASHI, Juri HARADA, Eiichi KOBAYASHI and Ruri SHOJI (75)
11. An Efficient Data Structure for Querying XML Document in Maritime Field
   ----------------------Chia-Hung SHIH, Nobukazu WAKABAYASHI Saburo YAMAMURA and
   Juri HARADA------( 83)

12. Study of Image Processing Method for Lookout Support at Sea
   --------------------------------Masatoshi SHIMPO, Riki SHU and Shigeiroyo YAMAMOTO------( 91)

13. On Substantial Examination of Ship Waves Generated by Tug Boats in Port of Kobe
   -----------------------------Shigeaki SHIOTANI, Kazuhiro MIZOSHITA, Tamotsu THUCHIHASHI and
   Masayuki KUNO------( 99)

14. Improvement of Accuracy on Numerical Simulation of Moored Ship Motions induced by Tsunami
   -------------------------------Masayoshi KUBO, Shoji TAKEDA, Yuji IWAMOTO and Shigeki SAKAKIBARA------(109)

15. Study on Hydrodynamic Forces Acting on Rudder of Fish-Shape Section with End Plates—II.
   —The Influence of Tail Length and Trailing Edge Thickness of the Rudder—
   ------------------------------------------------Yasuhiro KIMURA, Masafumi YAMASITA and Norio YUDA------(119)

   -------------------------------------------------------------Linjia YANG, Kinzo INOUE and Hiroyuki SADAKANE------(129)

17. Time of Action Taken by Stand-on Vessel
   -----------------------------------------------Masaki FUCHI, Shoji FUJIMOTO, Shinnosuke USUI and Hiroyuki IWASAKI------(137)

18. Energy Saving Operation for Coastal Ships with Consideration of Arrival Delay Risk
   ------------------------------------------Kyoko TAKASHIMA, Toshiyuki KANO and Mitsuru KOBAYASHI------(145)

19. Occurrence Tendency of Pilots' Collision Incidents in Japan
   —In Cases of Kammon Pilot District—
   ...Yuji Hayashi and Koji Mura.........(153)

   —Characteristics of the Working Environment—
   .................Junji KAWASAKI, Kuniharu OKUDA, shin-ya SHIMOKAWA and
   Masato HAMAGUTI.........(161)

21. A Study on the Seabed Classification Using Quantitative Echo Sounders
   --------------------------------Katsumori HATANAKA, Masaaki WADA and Masashi TODA------(169)

22. An Investigation into Effectiveness of Container Arrangements on Optimizing a
    Containership Stowage Plan
    --------------------------------NGUYEN Thanh Thuy, Etsuko NISHIMURA and Akio IMAI------(179)

23. Rating in Vessel's Self-completion Ability and Rescue-aid Ability using Marine
    Accident Estimated Cost
    -----------------------------------------------Tsukasa NAGAHATA------(191)

   -----------------------------------------------Takuji EBINUMA and Akio YASUDA------(199)
25. Performance Evaluation of the RTK-GPS Positioning with Communication Delay
                                        Jun ISEJIMA, Tomoji TAKASU, Takuji EBINUMA, and Akio YASUDA (205)

26. Basic Research of the MEMS Inertial Navigation Equipment for the Small Vessels
                                        Gen Fukuda and Shogo Hayashi (213)

27. A Basic Study on Enhancement of Electrical Visualization for Small Boat
                                        Hidetaka HEIBATAKE and Shogo HAYASHI (221)

28. Study on Radar Plotting Correction Support System
                                        Takuro FUKUHAMA, Tsuyoshi AKIMOTO and Kimio TATSUMI (227)

29. 3-D Precise Velocity Information by GPS and Evaluation Test
                                        Kimio TATSUMI, Nobuyoshi KOUGUCHI, Takashi KUBOTA and Yasuo ARAI (239)

                                        Midori SUMIYA, Sachiko FUKUSHIMA and Yutaka FUKUDA (249)

31. Estimation Technique of the Direction for Sound Source by the Phase Difference from Sensing Underwater Sound
                                        Motonobu IMASATO, Nobuo KIRIYA, Hiroshi Asou and Kuniyuki MATSUSHITA (257)
