BioPsychoSocial Medicine is an open access, peer-reviewed, online journal encompassing all aspects of research on the inter-relationships between the biological, psychological, social, and behavioral factors of health and illness.

BioPsychoSocial Medicine publishes research on psychosomatic disorders and diseases that are characterized by objective organic changes and/or functional changes that could be induced, progressed, aggravated, or exacerbated by psychological, social, and/or behavioral factors and their associated psychosomatic treatments.

BioPsychoSocial Medicine considers the following article types:

- Research
- Case reports
- Case studies
- Reviews
- Short reports
- Letters to the editor
- Commentaries

Reasons for publishing in BioPsychoSocial Medicine

- All articles published in BioPsychoSocial Medicine are open access. This means:
  1. They are universally accessible online without charge.
  2. They are immediately deposited and permanently archived in PubMed Central, the free-access repository of peer-reviewed research in the life sciences run by the USA’s National Institutes of Health, as well as other national archives.
  3. Authors retain the copyright of their articles and also grant any third party the right to use the article freely. This means that you are free to print out copies, email it to your colleagues, and/or post it on the web.

- High visibility for your work – anyone with Internet access can read your article, free of charge.
- All articles are entered into PubMed making your work easy to find, read and cite.
- Articles are published immediately upon acceptance.
- Electronic submission and peer review makes the whole process of publishing your article simple and efficient.
- Publishing online means unlimited space for figures, extensive datasets and video footage.
- Professional formatting meets the standards expected by researchers.
