CONTENTS

The 60th Annual Scientific Congress
Evaluation of an Absorbed Dose to the Human Body by Measuring Ionizations in a Cavity Chamber
FUJIO ARAKI 1365

The 61st Annual Scientific Congress
Symposium Rightness of Examination at X-ray CT: To Make Up the Guideline onto Evidence-Based Medicine
Introduction
YOSHIHISA MURAMATSU 1373
1. How to Apply X-ray CT Reasonably: Obligation of the Radiologists
JUNJI TANAKA 1374
2. Problems of Radiation Exposure in X-ray Computed Tomography and Optimization of Exposure Dose
KAZUO AWAI 1375
3. Understanding of Patient Dose Information and Patient Size Adjustment
TETSUYA HORIUCHI 1377
4. Setting Scan Conditions for Contrast Enhanced Abdominal CT with Viewpoint on Disease
TOHRU HIRANO, et al. 1380
5. Optimization of Image Quality by CT Scanner Automatic Exposure Control Systems
MASAMI TERADA 1384
6. Optimization of the Imaging Display for Each Patient in Computed Tomography
TOSHIHIRO ISHIHARA 1387

Educational Lecture—Interpreting Medical Images for Radiological Technologists
The Point of Mammography
TOMOMI KOYAMA 1392

Educational Lecture—Evidence-Based Radiological Technology
Strategy of Evidence Based Medicine for Radiotherapy
SHINJI KAWAMURA, et al. 1400

Basic Lectures—Medical Informatics
This and That in Construction of Systems
YASUO OKUDA 1408
The Consideration about the Storage Selection at the Time of System Introduction, and a User to Be Concerned
SHINYA OBARA 1414

Clinical Technology Course
The Characteristic of a Photo Luminescence Dosimeter: The Scope of Radiotherapy
YASUNOBU NAKO 1420

Report of Research Group
Hokkaido Helical CT Research Group
TSUKASA SASAKI 1426

JIRA Topics
Economical Benefit of Diagnostic Imaging: Part 1
TOSHI TAKIGUCHI 1428

Scientific Papers
Original
Development of a Breath Pacemaker for 2D-PACE Respiratory Gated MRCP: Efficacy of Image Quality Improvement
HITOSHI TANIGAWA 1431

Note
Optimization of Flip Angle for 3D-VIBE Technique in Liver Dynamic MRI
KENICHI NAITO, et al. 1441

Clinical Technology
Examination of Retention Index in Brain Tumor 201 TI Scintigraphy using INRT
YASUSHI YAMAMOTO, et al. 1447

Others
