CONTENTS

The Journal of the Japan Society for Bronchology
Vol. 25, No. 8 December 2003

Symposium 1
Development and Future of the Convex Scanning Type Ultrasonic Bronchoscopy and Optical Coherence Tomography .......................... Aeru Hayashi, et al. .............................. 595
Development and Clinical Applications
of a Side-viewing Magnification Bronchovideoscope ........................ Gen Yamada, et al. ......................... 603
Assessment of Pre-operative Endobronchial Ultrasonography
for Determination of Depth of Tracheobronchial Tumors ........................ Noriaki Kurimoto, et al. .......................... 607
Endoscopic Fluorescence Diagnosis
of Centrally-located Early Lung Cancer and hTERT Expression
as a Possible Marker of Early Development of Lung Cancer ........................ Yuka Miyazu, et al. .......................... 613

Symposium 2
Novel Techniques for the Placement of Silicone Stents
Using Flexible Bronchoscope ............................................................... Teruomi Miyazawa, et al. ..................... 617
Study of Various Airway Stents ................................................................. Jun Araki, et al. .............................. 622
Co-operative Study of Spiral Z Stent for Malignant Airway Stenosis ........................ Hirohito Tada, et al. .............................. 632
Indication and Stent Selection in Stent Placement
Against Malignant Airway Stenosis .......................................................... Keisuke Matsuo, et al. .............................. 637

Symposium 3
The Cooperation Between Diagnostic Radiology
and Bronchoscopic Examination and Treatment ................................. Masahiro Kaneko, et al. .............................. 641
Roles of Anesthesiologists as Bronchoscopists
and Cooperation of Anesthesiologists With Bronchoscopists
in the Operating Theater ........................................................................ Kazuyoshi Hirota, et al. .............................. 644
A Relationship Between Bronchoendoscopists
and Otolaryngologists ............................................................................ Masahiro Kawaida .............................. 649
Role of Fiberoptic Bronchoscopy
in Emergency and Intensive Care Unit .................................................... Kazui Soma .............................. 652

Symposium 4
Morphologic Analysis of Peripheral Airway and Lung by Micro-CT ............................. Eisuke Matsui, et al. .............................. 656
Physiologic Assessment of Flow Limitation
in Tracheobronchial Stenosis ................................................................. Teruomi Miyazawa, et al. .............................. 661
Symposium 5
Indication and Operating Physicians
of Thoracoscopy Under Local Anesthesia ..................................................Takayuki Kaburagi, et al. .......................... 665
Current Situations of Medical Thoracoscopy
for Pleural Diseases in Fujigaoka Hospital .............................................Michiaki Narushima, et al. ................. 669
Video-assisted Thoracic Surgery (VATS) Lobectomy for Lung Cancer
—Is VATS Lobectomy Less Invasive Surgery as Expected?— ..................Masashi Muraoka, et al. .......................... 674

Symposium 6
Significance of Mediastinoscopy for Respiratory Disorders ..................Tetsuhiro Shiota, et al. .......................... 679
Concurrent Use of Video-mediastinoscopy and Video-thoracoscopy
for Accurate Staging of Lung Cancer ..................................................Hajime Maeda, et al. .......................... 683
Mediastinoscopy in 54 Patients:
Indication, Efficacy, and Complication ..............................................Makoto Oda, et al. .......................... 687
Video-assisted Mediastinoscopic Lymph Node Biopsy
for Lung Cancer Patients With PET-positive Mediastinal Nodes ...........Mitsuyo Nishimura, et al. .......................... 691

Symposium 7
Bronchial Occlusion Using EWS (Endoscopic Watanabe Spigot)
by Push & Slide Method and a Pilot Study of Bronchoscopic
Lung Volume Reduction Using EWS for Severe Emphysema .................Hideki Miyazawa, et al. .......................... 695
Bronchial Occlusion ............................................................................Yoichi Watanabe, et al. .......................... 704
Efficacy of Endobronchial Radiation Therapy Using 192Ir HDR
for the Local Control of Endobronchial Carcinoma ..........................Masanori Kaneda, et al. .......................... 714
Endobronchial High-frequency Electrosurgical Scissors
Forceps (Endobronchial Shears), Its Development
and Clinical Applications ....................................................................Kiyoshi Yoshizawa, et al. .......................... 720

Symposium 8
Anesthesia on Bronchoscopy: Our Methods With Intravenous
Midazolam Sedation and Experience in Germany ............................Tetsuhiko Go, et al. .......................... 725
Safety Method for Fiberoptic Bronchoscopy
in Patients With Asthma ....................................................................Hiroshi Tanaka, et al. .......................... 730
Usefulness of Angled Forceps for the Biopsy of Solitary
Pulmonary Lesions That Can Not Be Reached by Normal Forceps .......Shinji Sasada, et al. .......................... 733
Bronchoscopy in the Era of Electronic Medical Record ......................Akira Fujita, et al. .......................... 738
