CONTENTS

The Journal of the Japan Society for Respiratory Endoscopy
Vol. 32, No. 2 March 2010

Original Articles
Comparison of the Percutaneous Dilatational Tracheostomy by Pulmonologists and the Conventional
Surgical Tracheostomy ................................................................. Masayuki Ishida, et al. .................. 115
Virtual Bronchoscopic Navigation in the Diagnosis ofPeripheral Pulmonary Lesions with, an Ultrathin Bronchoscope .......... Kenji Baba, et al. .................. 120
Usefulness of Segmental Bronchoalveolar Lavage Therapy in Cases with Idiopathic Pulmonary Alveolar Proteinosis ............ Atsuko Iwata, et al. .................. 127
Midazolam for Sedation in Bronchoscopic Examination —A Questionnaire on Patient Satisfaction— ................. Katsuo Usuda, et al. .................. 133

Case Reports
A Case of Large Cell Neuroendocrine Carcinoma That Was Diagnosed as Small Cell Lung Cancer Preoperatively by Transbronchial Biopsy .............................................. Itaru Nagahiro .................. 138
A Case of Cervical Tracheal Injury in a Child Due to Blunt Trauma .................................................. Ryosuke Usuda, et al. .................. 143
A Case of Penetrating Tracheal Trauma Caused by Attempted Suicide ............................................ Takuya Nagashima, et al. .................. 148
Monopolar Coagulation Via VATS in a Case of Giant Bulla ........... Katsuhito Ueno, et al. .................. 153
Total Thoracoscopic Right Upper Lobectomy for Lung Cancer with a Displaced Right Bbronchus and
Incomplete Lobulation ........................................................................ Akihiro Ohsumi, et al. .................. 157
A Case Showing Tracheal Origin of MALT (Mucosa-associated Lymphoid Tissue) Lymphoma That Could Be Observed with Autofluorescence Imaging Bronchovideoscope
Before and After Treatment .......................................................... Yusuke Ueda, et al. .................. 162
A Case of Relapsing Polyochondritis with Respiratory Tract Involvement in Which FDG-PET/CT Was of Great Value for Diagnosis and Management ............................................ Yuko Katayama, et al. .................. 169
A Case of Primary Pulmonary Mucosa-associated Lymphoid Tissue (MALT) Lymphoma Presenting Multiple Endobronchial Submucosal Nodules ............................................ Keishi Ohtani, et al. .................. 176
A Case of Bronchial Schwannoma Combined with Adenocarcinoma of Lung ........................................ Seijiro Sato, et al. .................. 181
A Case of Epithelioid Hemangioendothelioma
Diagnosed by Bronchoscopy .......................................................... Satoshi Hirano, et al. .................. 186
Paragonimiasis Westermannii as Diagnosed by Detecting Parasitic Ova in Bronchial Brushing Specimens:
A Case Report .............................................................................. Shinobu Kuratomi, et al. .................. 191
