Instructions for Authors (For English articles)

The Journal of the Japan Society for Respiratory Endoscopy (J Jpn Soc Respir Endoscopy) is a journal published bimonthly by the Japan Society for Respiratory Endoscopy. Articles must be prepared in accordance with "The Uniform Requirements for Manuscripts Submitted to Biomedical Journals" (http://www.icmje.org/urm_full.pdf), must be contributed solely to the Journal of the Japan Society for Respiratory Endoscopy, and become the property of the Japan Society for Respiratory Endoscopy, if published. Statements contained therein are the responsibility of the author(s). The Society reserves copyright and renewal republishing rights on all published material and such material may not be reproduced in any form without the written permission of the Society.

Manuscript

Papers reporting human experimentation will be reviewed in accordance with the precepts established by the most recent version of the Helsinki Declaration. Such papers must include a statement that the human investigations were performed after approval by an Institutional Human Investigations Committee. Authors submitting manuscripts containing data from experiments involving recombinant DNA molecules must provide a statement which certifies that their experiments complied with the appropriate guidelines approved by the governmental agencies on physical and biological containment procedures.

The Journal of the Japan Society for Respiratory Endoscopy will not accept articles in which a significant portion of the data in the form of figures and tables have been published or submitted for publication elsewhere. Copies of material that might be considered as prior or duplicate publication should be submitted with the manuscript and clearly marked as such in order not to be confused with the actual manuscript submitted.

Manuscript Submission

Authors should submit their manuscripts to the Journal of the Japan Society for Respiratory Endoscopy manuscript online: http://mc.manuscriptcentral.com/kksjg. The main text must be typed double-spaced with wide margins (about 2.5 cm). Tables and figures should be uploaded separately from the main document. Arrange the paper in the following order: (1) Title page; (2) Abstract; (3) Text; (4) References; (5) Figure legends.

Incomplete or improperly prepared manuscripts will be returned to authors without review.

Conflict of Interest (COI)

All authors are required to disclose any financial relationship (within the past 12 months) with any biotechnology manufacturer, pharmaceutical company, or other commercial entity that has an interest in the subject matter or materials discussed in the manuscript.

COI status must be clearly disclosed at the time of article submission, using Form 2-B (the Journal of the Japan Society for Respiratory Endoscopy Conflict of Interest Disclosure Statement).

Upon a manuscript is submitted, the form needs to be uploaded online by the corresponding author. The disclosures will be held in confidence while the manuscript is under review, and will not influence the editorial decision.

Once a manuscript is accepted for publication, all of the disclosures will appear at the end of the manuscript, before the Acknowledgement and References. If there is no such relationship, the statement "No potential conflicts of interest are disclosed" will appear in the same position.

Copyright Transfer

The authors are required to agree that the copyright for this article is transferred to the Japan Society for Respiratory Endoscopy, if and when the article is accepted for publication.

The Japan Society for Respiratory Endoscopy reserves copyright and renewal on all published materials. Such materials may not be reproduced in any form without the written permission of the Society.

Privacy

To protect the privacy of patients, the following items cannot be included in the manuscript: patient's names, initials, ID numbers, date of birth, address (prefectures or states are acceptable), precise dates by which the identity of the patient can be established (dates should be expressed as a specific month), no photographs of the patient's face (only photographs which do not identify a patient can be used), unless when necessary and with specific formal consent from the patient in writing.

The following items may be included in the manuscript:
- age of the patient
- gender
- region of residence

Categories of Manuscripts

Original Articles

The editors of the Journal of the Japan Society for Respiratory Endoscopy welcome concise original articles devoted to respiratory endoscopy and its subspecialties.

Abstracts for Original Articles are limited to 500 words and should be structured according to the following format: Objective, Methods, Patients or Materials, Results, Conclusion.

A list of 25 key words and subjects that will be useful for indexing or internet searching (i.e. not included in the title) should be added to the bottom of the abstract page.

Case Reports

Reports of clinical cases are welcome.

Abstracts for Case Reports are limited to 300 words.

A list of 25 key words, and the some regulations as for Original Articles apply.

Review Articles

Review Articles are usually solicited by the editors, but we will also consider unsolicited manuscripts. The manuscript must be no longer than 5,000 words, with an abstract of no more than 500 words.

A list of 25 key words, and the some regulations as for Original Articles apply.

Units of Measurement

All measurements must be expressed in metric units or the Système International d'Unités (SI).

Use a capital letter "L" for liter in the units of measurements in the text, figures and tables (g/dL, mg/dL, IU/L, mg/ dL, mEq/l).

Title Page

Include first name, degree, and affiliation for all authors.

Indicate the institution of each author (city and country) at the time of the study.

Include (as a footnote) the name and address of the institution from which the work originated plus information about financial support, and the name and E-mail address of the person to whom reprint requests should be sent.
Include a short running head or foot line of no more than 10 words.

Key Words
A list of 2-5 key words (preferably words not included in the table) and subjects that will be useful for indexing or searching should be added to the bottom of the abstract page.

Text
Do not use acronyms as abbreviations without first spelling them out other than those for units of measurement. Using parentheses, cite each reference, figure and table in numerical order [ex. (48-10); (Figure 2); (Table 3)]. Order of mention in text determines the number given to each.

Place give acknowledgements at the end of the text, before the references.

References
Number in the order in which they appear in the text.
Provide inclusive page numbers for all journal references and book chapters, and the specific page numbers for book references. Indicate all abstracts as "(Abstract)". Use abbreviations for the names of all journals listed in Index Medicus. In case of journals which are not listed in Index Medicus, spell out the full name of English language journals. When the main text of the reference is not in English, use the original language name of the journal and add information of the language to read as "in Japanese" after the date of the citation.

If the official English translation of the name of the journal is printed on the cover, include the English name in parentheses after the original name. If only the abstract is in English, include "(Abstract only in English)".

Citations of unpublished work should not be entered in the list of references unless the paper has been accepted for publication. Include them in the text as "unpublished observation", "personal communications", or "manuscript in preparation", with authors' initials and surnames.

Personal communications must be accompanied by a copy of the correspondence or a letter from the correspondent to this editorial office.

Follow the general instructions, abbreviations and punctuation as given in the Uniform Requirements for Manuscripts Submitted to Biomedical Journals. For periodicals, follow Index Medicus, listing all authors when three or fewer, when four or more, list only the first three and add "et al."

Please note that no periods are used after authors' initials.
Sample references are as follows:

Figure Legends
Start at the top of a new page.
Number pages in sequence after the last page of references.
Identify at the end of each legend and in alphabetical order all abbreviations in the figure described.
When arrows are used in the figure, indicate the specific feature in the figure legend followed by "arrow" or "arrowhead".
Indicate magnifications for all photomicrographs.

Tables
Give each table a number (in Arabic numerals: Table 1, 2, etc.) and a title. Number the tables in the order in which they are mentioned in the text.
Do not use vertical lines within tables.
Provide footnotes for each table identifying all abbreviations used.
Limit tables to the minimum number and size necessary for clarity.

Figures
Use black ink for all charts (line drawings). Make decimals, broken lines, etc., distinct enough for reproduction when reduced to column width, two-column width, or intermediate width.
Do not combine very large type with very small type; all lettering should be of approximately equal size.
Use arrows to designate special features.
Crop photomicrographs to show only the essential field.
Do not include titles in the figure; this information should be included in the figure legend.
Carefully consider the proportions for each part of a multipart figure.
Number figures in the order in which they are mentioned in the text.
Submit written permission from the publisher and author to reproduce any previously published figures.
Limit figures to the minimum number necessary for clarity.
When authors use a photograph of a patient, the patient must be none identifiable. Submission together with written permission by the patient is necessary when authors use an identifiable photograph of the patient.

Abbreviations
If abbreviations are used, they must be defined with full-spelling at the place of first use in the text.

Drug Names
Generic names should be used. If an author so desires, brand names may be inserted in parentheses.

Page Charges
The Journal publishes papers free of charge. Articles written in English can be downloaded free of charge.

Notice of Correction
Although sometimes there is a request to correct a published contribution, when the correction is minor and does not affect the reader's understanding of the contribution, such as a spelling mistake or a grammatical error, the Journal of the Japan Society for Respiratory Endoscopy will not publish such a correction.
