CONTENTS

Coastal Environments and the Expected Role
- For Ocean Engineering ................................................. (1)

Application of Modified k-e Models to Turbulent
Swirling Flow in a Straight Pipe................................. (9)

Aerodynamic Characteristics and Shape Optimization
of Ram-Wing Type 3D Wig Based on Panel Method........ (15)

Experimental Verification of Optimized Hull Form
Based on Rankine Source Method................................ (27)

On Study of Ship Propulsive Performance of Ships
Registered in Japan since 1950 (The Second Report)
- Container Ships ....................................................... (35)

On Study of Ship Propulsive Performance of Ships
Registered in Japan since 1950 (The Third Report)
- Ferry Boats ............................................................... (45)

On Study of Ship Propulsive Performance of Ships
Registered in Japan since 1950 (The Fourth Report)
- Ships Tabled in Bulletin of the Kansai Soc. N.A. .... (51)

The Experiment and Numerical Calculation of Hydrofoil-
Performance with Surface Roughness Effects............. (59)

A Study on Automatic Ship Berthing Using Parallel
Neural Controller .......................................................... (65)

Waves Due to Periodic Oscillations of a
Wave-Suppressor Plate in a Circulating Water Channel... (71)

Some Examinations of Capsizeing Probability Calculation for
an Indonesian RoRo Passenger Ship in Waves .......... (81)

On the Numerical Approach to Two Dimensional Problem
of Steady and Unsteady Planing Surface ..................... (87)

On Effects of Ship Form upon Steady Horizontal
Forces and Moment due to Short Waves ................. (97)

An Investigation of Hydro-Elastic Responses of a Very Large
Floating Body in Waves (2nd Report)............................. (107)

Comparison of Environmental Performance and Economical
Benefit of Land and Marine Transportation System
- Validation of LCIA with AHP Method ......................... (113)

A Consideration on Inflow Velocity to Rudder of Ship
Equipped with Controllable Pitch Propeler ............... (123)

A Quick Chart for Added Moment of Inertia
of Floating Structures with Block Types.................. (131)

Computation of Hydrodynamic Forces Acting on a Ship
- Using Large Angles in Small Cylindrical Towing Tests .... (137)

On the Mathematical Model of Hydrodynamic Forces due
To Cross Flow in Ship Turning Motion ......................... (145)

Translational Characteristics of Hydrodynamic Forces
Acting on a Hull in Oblique Towing Motion .......... (151)

A Proposal to Maneuverability Design Standard of Large
Full Ships Based on Ship Handling Performance ....... (159)

A Design Procedure of Stern Profile and Rudder Area
for Large Full Ships in View of Course Stability .... (167)

Economic Evaluation of Shipkeeping Permanence of a
Passenger Ship from the Point of View of Seacickness (175)

A Study on Transverse Porpoising of a Planing Craft
in Drifting Motion (1st Report) - Measurements of
Vibrations and Mechanism of Occurrence ............... (181)

A Study of Nonlinear Fluid Phenomena with Particle
Method (part 1) - Two-Dimensional Problems ......... (187)

On the Property of Wave Statistics......................... (199)

Water Impact Response of Container Ship
Bow Flare by Numerical Method ............................... (211)

Water Body Collision Using Fluid-Structure Dynamics
Interaction - Development of Simulation Program and
Evaluation for Simplified Models ................................. (219)

Finite Element Method for Hot Cracking
- Linear Interface Element (4th Report) - Analysis of Hot Cracking on Transverse Cross Section ....... (227)

Optimal Ship Structural Design by Response Surface
Methodology with Basis Vector
- Optimization of Double-Bottom Side-Bracket Structure .... (235)

Performance Evaluation for a Surface Effect Ship (SES)
without Flexible Seals ............................................... (243)

A Prediction Method of Travel Demand Considering
Societies' Point of View
- Feasibility Study on New Marine Transportation ... (251)

Effect of Column Spacing on Wave Force ..................... (263)

Changes of Export and Import Container
Handling Activities in Kobe Port ................... (271)

Modelling Towards Container Cargo Activities in Kobe Port
- Numerical Simulation on Effects of Purification Apparatus
in Enclosed Sea by Using MEC Model........ (279)
