# CONTENTS

Voyage Data Analysis of Ships with High Propulsive Performance Bow "SEA-Arrow" .......................................................... Takeshi UEDA, Yasunori IWASAKI ........................................... (1) Masaki ANDA, Kazuyuki EBIRA

A Component-Type Mathematical Model of Heel Moment Acting on a Ship Hull in Steering Motion ........................................ Kazuyoshi MAEKAWA, Keiichi KARASUNO .................................. (9) Yusuke ASHIDA

Effects of Running Attitude on Hydrodynamic Forces for Oblique Towed Planing Craft .......................................................... Toru KATAYAMA, Ryou KIMOTO ............................................. (15) Takashi IIDA, Yoshiho IKEDA

An Experimental Study on Roll Motion of a Damaged Large Passenger Ship in Intermediate Stages of Flooding .......................... Toru KATAYAMA, Yuki TAKEUCHI .......................................... (23) Yoshiho IKEDA

A Study on Nonlinear Wave-Body Interactions due to Impulsive Motion(2nd Report) ............................................................. Hajime KIHARA ................................................................. (31)

Guidance and Control of Biomimetic Underwater Robot with Mechanical Pectoral Fins ...................................................... Toshihide SHIGETOMI, Yoshito ANDO ...................................... (41) Naomi KATO

A Basic Study on Ship Drifting by Tsunami .................................... Eiichi KOBAYASHI, Syunichi KOSHIMURA .............................. (49) Masayoshi KUBO

Influence of Warping due to Vertical Shear Force on Ultimate Longitudinal Strength of Hull Girder ............................................... Tetsuya YAO, Eiichiro IMAYASU ........................................... (57) Yoshitaka MAENO, Yasunari FUJII Mikio NOSE

A Measurement of Inherent Deformation in Typical Welded Joints Using Inverse Analysis .................................................. Wei LIANG, Shinji SONE ...................................................... (71) Hidekazu MURAKAWA, Kunio KATO

Optimal Hullform Design of Fast Ships for SWATH Type and Pod Type Hulls. ............................................................ Shinsuke AKAGI, Mitsue MORISHITA ..................................... (79) Fumio NAKAHATA

On the Towing of Damaged Ships (3rd Report : Ship Motion and Wave Drift Force of Various Kinds of Ships) ............................ Shoichi HARA, Kunihiro HOSHINO ....................................... (87) Kazuhiro YUKAWA, Kenji YAMAKAWA

Assessment of Ultimate Hull Girder Strength in Longitudinal Bending ........................................................... Hiroshi KAWABE, Yoshitaka MAENO .................................... (97) Hajime OHTANI, Yasunari FUJII Tetsuya YAO

A Case Study of CCl4 Accident in Shanghai ......................................................................................................................... Pingliang LIU, Eiichi KOBAYASHI ........................................... (109)

C-N-P Conservation Model for the Coastal Environmental Assessment ....................................................................................... Naoki NAKATANI ................................................................. (117)

Mathematical Model for Developing Data-Base System of Environments in Coastal Sea Area, 4th Report —Spatial Distribution and AR Component of Water Quality Data— Tomoki YAMADA, Hironori FUJINAMI ................................ (137) Ryusuke HO Soda

Simultaneous Measurement of Velocity and Density Fields of Gravity Current ........................................................................ Yugo SANADA, Yasuyuki TODA ........................................... (145) Sachiko HAMACHI, Toshio SUZUKI

A Study of Weather Routing Considering Real Time Data of Weather and Ocean for Sailing Ship in Coastal Sea Area —Basic Simulation of Ship Positioning by Ship Maneuvering and Experiment by a Real Ship— Haibo XIA, Shigeaki SHIOTANI ........................................... (159) Eiichi KOBAYASHI Nobukazu WAKABAYASHI
