## Contents

### Current Topics: Update on Diagnostic Medical Imaging
- Introduction .......................................................... Takashi MIIDA ........ 88
- Current Status of Coronary Disease Diagnosis Using Multi-Detector Row Computed Tomography
  ................................................................. Eriko MATSUNAGA ........ 89
- Diagnosis of Small-Intestinal Disease with Capsule Endoscopy ................. Tomoyoshi SHIBUYA, *et al.* ........ 94
- Diffusion MR Imaging of White Matter Pathways: Visualization and Quantitative Evaluation
  ................................................................. Koji KAMAGATA, *et al.* .......... 100
- Usefulness of Joint Ultrasonography in Medical Care for Rheumatoid Arthritis
  ................................................................. Michihiro OGASAWARA .......... 107

### Special Reviews: Disaster Preparedness in Juntendo Hospitals
- Disaster Medicine Education and Training for Medical Student at Juntendo University
  ................................................................. Atsushi YAMADA, *et al.* .......... 112
- Disaster Simulation Desk-top Training Report ........................................... Tomoko TAKAHASHI, *et al.* ........ 119
- Preparedness for Disasters in Juntendo University Shizuoka Hospital ........... Kazuhiko OMORI, *et al.* .......... 121
- Disaster Response Efforts at Juntendo University Urayasu Hospital ............ Yuichi FUKUMOTO, *et al.* .......... 126
- Disaster Control at Juntendo University Nerima Hospital ......................... Hajime SEKII, *et al.* .......... 132

### Original Articles
- Variability of the Arterial Distribution to the Rotator Cuff Muscles and Its Correlation with the Diversity of Arterial Origin ................................................................. Toru SERITA, *et al.* .......... 137
- The Relationship between the Perioperative Transition of Serum Anticholinergic Activity and Postoperative Delirium in Patients Undergoing Esophagectomy and Gastrectomy
  ................................................................. Yuka KITAJIMA, *et al.* .......... 147

### Lecture Note
- Podocyte Cell Biology Update –Understanding the Formation of Podocyte Structure in Health and Disease ................................................................. Hidetake KURIHARA .......... 151
- Therapeutic Targeting of Microenvironmental Interactions in Leukemia: Mechanisms and Approaches ................................................................. Yoko TABE .......... 156

### Case Reports
- A Case of Breast Cancer Associated with Multiple Bone Metastases Successfully Treated with Denosumab and Capecitabine ........................................................ Torahisa SUZUKI, *et al.* .......... 161
- Local Anesthetic Infiltration of the Wound for Postoperative Pain Management in Pediatric Cases ................................................................. Toshihiro KIKUCHI, *et al.* .......... 166

### Original Article Submission Guidelines ................................................................. 170
### Instruction to Authors ................................................................. 172
### Editor’s Note ................................................................. 174
