Summary of Gastrointestinal Cancer Chemotherapy Symposium on August 5, 2014. “Fudan University – Juntendo University”

SUMIO WATANABE*1), NOBUKO SERIZAWA*1), JIN KAN SAI*2), YANG JIANWEI*3), SHUNSUKE KATO*4)

*1) Department of Gastroenterology, Juntendo University Graduate School of Medicine, Tokyo, Japan, *2) Division of Diagnostic Imaging and Minimally Invasive Therapy, Juntendo University Graduate School of Medicine, Tokyo, Japan, *3) Department of Abdominal Oncology, Fujian Provincial Cancer Hospital, Fujian, China, *4) Department of Medical Oncology, Juntendo University Graduate School of Medicine, Tokyo, Japan

A group of inspectors, including 28 physicians and 1 student from Fujian Provincial Cancer Hospital, Fujian Medical University Union Hospital, Hospital of Beijing Armed Police Corps etc. visited Juntendo University on August 5, 2014.

First of all, a brief conference was held and Professor Daida and Professor Watanabe gave a short speech of welcome. In the conference, Dr. Nobuko Serizawa gave a talk on gastric cancer chemotherapy in Japan and in Juntendo hospital (Figure-1).

Next, Dr. Jin Kan Sai gave a talk on the diagnosis and treatment of pancreatic cancer in Japan and in Juntendo hospital (Figure-2).

As for the guest speaker from China Yang Jianwei gave a talk about gastric cancer chemotherapy in China including the difference from other countries (Figure-3). During the presentation Dr. Shunsuke Kato gave some comments and questions. Finally, speakers had an active discussion about gastrointestinal cancer.

Key words: gastric cancer, pancreatic cancer, chemotherapy

Figure-1  Treatment option based on HER2 status
Patients with HER2 positive receive capecitabine+CDDP+trastuzumab. Patients without HER2 expression receive S-1+CDDP.

Figure-2  Overall Survival in FOLFIRINOX group and gemcitabine group
This graph shows the result of Overall Survival in both groups. Median OS was 11.1m in the FOLFIRINOX group as compared with 6.8m in the gemcitabine group.
