Contents

What’s New from Juntendo University, Tokyo
Peking University – Juntendo University Joint Symposium on Brain and Skin Diseases
  • The 4th International Academic Symposium, Peking University and Juntendo University
    Hajime Arai 276
  • Special Memorial Lecture: Honorary Emeritus Professorship from Peking University
    Hideoki Ogawa 278
  • Program
    281
  • Atopic Dermatitis: Where We Are
    Jianzhong Zhang 282
  • Mechanisms and Managements of Intractable Itch in Atopic Dermatitis
    Kenji Takamori, et al. 285
  • Study on Cutaneous T-Cell Lymphomas in China, Switzerland and USA
    Chunlei Zhang 290
  • Antimicrobial Peptides: an Essential Component of the Skin Defensive Barrier
    François Niyonsaba, et al. 292
  • Rare Fungal Infections: What Should We Know?
    Ruoyu Li, et al. 295
  • New MRI Techniques for the Evaluation of the Cerebrovascular Diseases
    Yining Huang 298
  • Advances of Diffusional MR Imaging of the Brain
    Shigeki Aoki, et al. 300
  • Measurement of the Brain Extracellular Space Using Tracer-Based MRI
    Ze Teng, et al. 302
  • Genetics and Parkinson’s Disease
    Taku Hatano, et al. 308
  • Notch Pathway Plays an Important Role in the Formation of Xenograft Model with Original Spinal Cord Diffuse Astrocytoma Cells
    Jianjun Sun, et al. 311
  • Deep Brain Stimulation for Parkinson Disease: Present Status and Future Subject
    Atsushi Umemura 315

Original Articles
Determinants of Sense of Coherence in Male Japanese Workers: a Cross-Sectional Study
Sayako Komatsu, et al. 318
Changes in Blood Glucose and Lipid Metabolic Parameters After High-Carbohydrate Diet Ingestion in Athletes with Insulin Resistance
Tomomi Hasegawa-Tanaka, et al. 323

Reviews
Glycocalyx Regulates the Intravascular Hemostasis
Toshiaki Iba 330

Case Reports
Pulsatile Scalp Mass Induced by Head Injury: Angiolymphoid Hyperplasia with Eosinophilia – a Case Report –
Hideki Bandai, et al. 336

Publication List
Publications from Juntendo University Graduate School of Medicine, 2014 [2/6] 340

The Juntendo Medical Society

From the illustrator: Concerning Houttuynia cordata, I remember that my mother broiled its leaves, and applied them to my rashes when I was a child. There are various ways to effectively use this plant, such as making an infusion of it as a herbal medicine with decanoyl acetaldehyde as a chief ingredient showing an antimicrobial action, and placing it in a vase for flower arrangement (Akiko Miyamichi).
