Retraction: Oligomycin, an F$_{1}$F$_{0}$-ATPase Inhibitor, Protects Against Ischemic Acute Kidney Injury in Male but Not in Female Rats
Ryosuke Tanaka, Junji Takayama, Masanori Takaoka, Yohko Sugino, Mamoru Ohkita, and Yasuo Matsumura

The article of Journal of Pharmacological Sciences, “Oligomycin, an F$_{1}$F$_{0}$-ATPase Inhibitor, Protects Against Ischemic Acute Kidney Injury in Male but Not in Female Rats” by R. Tanaka et al., published in Volume 123, Issue 3, Pages 227 – 234 has been retracted by agreement between the authors and the journal. This article has been retracted because the figures included in the article are duplicated in part from the paper by J. Takayama et al., Eur J Pharmacol. 581(1 – 2):157 – 163, 2008. One of the conditions for submitting a paper for publication in Journal of Pharmacological Sciences is that the authors declare explicitly that their data are original and have not been submitted for or appeared in a publication elsewhere. As such this article represents a violation of the journal’s publishing policies.
