Transactions of the Japan Society for Industrial and Applied Mathematics

Vol. 22 No. 3 2012

Application
Apportionment Methods Maximizing Rényi’s Entropy

Tetsuo Ichimori 81

An Image Analysis for Detecting Cancer Tissue via the Algorithm Based on the Topology

Kazuaki Nakane, Marcio Gameiro, Takashi Suzuki and Nariaki Matsuura 97

Note
Numerical Stability of First Order Weak Schemes for Storatonovich Stochastic Differential Equations

Yoshihiro Saito 109

On Convergence Behavior of the GMRES(m) Method with the Deflation-Type Restart and the Look-Back-Type Restart

Akira Imakura, Ji-Rong Yang, Tomohiro Sogabe and Shao-Liang Zhang 117

Special Topics: Activity Group “Scientific Computation and Numerical Analysis”

Theory
A Lagrangian Approach to Deriving Local-Energy-Preserving Numerical Schemes for the Euler-Lagrange Partial Differential Equations and an Application to the Nonreflecting Boundary Conditions for the Linear Wave Equation

Takaharu Yaguchi 143

Finite difference Approximation Requiring Function Values on Non-Grid Points

Masahisa Tabata and Hirofumi Notsu 171

Survey
Theoretical Analysis of Sinc Methods for Integral Equations of the Second Kind from a Practical Viewpoint

Tomoaki Okayama 181

Structure-Preserving Numerical Methods for Differential Equations

Takayasu Matuo and Yuto Miyatake 213

The Japan Society for Industrial and Applied Mathematics
