Plate 1. The Semipalmated Plover *Charadrius semipalmatus* in Aisai city, Aichi Prefecture, Japan (taken on 5 December 2006 by Nobuhiro Hashimoto). At the base of the bill, the border between the dark and white coloration below the eye reaches above the gape of the bill. A narrow yellow orbital ring is evident.
Plate 2. Apparently white wing bar (taken on 5 December 2006 by Nobuhiro Hashimoto).

Plate 3. The webbing between inner and middle toes (taken on 5 December 2006 by Nobuhiro Hashimoto).
