
No.1

ORIGINAL PAPERS

- Evaluation of Powder Rheology in a Gas-solid Suspending System
  Kazuhiro Nakashima, Yoshiyuki Komoda, Hiroshi Suzuki and Hiromoto Usui .................................................. 4
- Effect of Functional Groups in Polymers on Rheological Behavior of Alumina Suspension and Properties of Alumina Green Sheets
  Kouichi Nagata and Hiroyuki Takase .................................................................................................................... 10
- Development of PCS Apparatus for Polydisperse Single Nanoparticles and Its Performance Evaluation
  Tetsuji Yamaguchi and Kikuo Okuyama .................................................................................................................. 19

REVIEW

- Direct Numerical Simulations of Charged Colloidal Dispersions – Basis and Usage of KAPSEL –
  Kang Kim, Yasuya Nakayama and Ryoichi Yamamoto .......................................................................................... 28

LECTURE SERIES

- Powder Nanotechnology
  2. Powder Technology for Future Nanotechnology
  2.3 Preparation of Nanoparticulate Drug Carrier
  – Powder Nanotechnology for Functionalization of Polymeric Drug Carrier –
  Yoshiaki Kawashima, Hiromitsu Yamamoto and Kai Shi ......................................................................................... 37

DOCTORAL THESIS INTRODUCTIONS

- Molecular-Scale Friction Characteristics of Silica Surfaces in High pH Solution Studied by Atomic Force Microscopy
  Elena Taran .................................................................................................................................................................. 49
- Analysis of Penetration and Permeation Mechanisms Based on Packing Structure of CastFilm with Different Particle Shape and Application to Battery Electrode
  Katsutomo Ohzeki .................................................................................................................................................... 50

No.2

ORIGINAL PAPERS

- Estimation of Joint Strength by Micro Discharge Welding and Effects of Preheating on the Joint Strength
  Mitsuru Egashira, Takashi Konno and Mikihiro Kobayashi .......................................................................................... 94
- Synthesis of Na-A Zeolites from Diatomaceous Earth
  Hidekazu Tanaka, Yoshihiko Tanaka, Hirushri Kira and Ryozi Hino ........................................................................... 101
- Effect of Flow Behavior in De-NOx Catalyst Honeycomb on Adhesion of Particles to the Wall
  Ryoichi Kurose, Takamobu Michioka, Hisao Makino and Satoru Komori ..................................................................... 107

REVIEW

- Recent Technology of Wet-type Particle Classification
  Hideto Yoshida .......................................................................................................................................................... 113

REVIEW : FRONTIER RESEARCH SERIES

- Control of Microbial Adhesion with Colloid Science Techniques
  Toshiyuki Nomura ...................................................................................................................................................... 122

LECTURE SERIES

- Powder Nanotechnology
  3. Measurement and Analysis for Nanoparticles
  3.1 Characterization of Nano-particles by Spectroscopy
  Tomoya Ohno and Hisao Suzuki ............................................................................................................................... 128

DOCTORAL THESIS INTRODUCTION

- Study on Separation of Powder Materials Using Screens
  Satoshi Ishikawa ........................................................................................................................................................ 136

No.3

Special Issue of the 42nd Summer Symposium

- Toward Further Progress in Computer Simulations of Powder Systems
  – Scaling up, Speeding up, Hybrid Modeling and Continuum Modeling –

REVIEW

Jusuke Hidaka and Norichika Katsura

ORIGINAL PAPERS

- Large-scale DEM-CFD Coupling Simulation
  Takuya Tsuji, Kazuki Nakamura, Keizo Yabumoto and Toshitsugu Tanaka

- Prediction of Power Consumption During Planetary Ball Milling by DEM Simulation and its Correlation with Grinding Rate Constant
  Yuichiro Suzuta, Junya Kano and Fumio Saito

- Analysis of Abrasion Mechanisms of Grinding Media in a Planetary Mill with DEM Simulation
  Yasuaki Nakayama, Kang Kim and Ryoichi Yamamoto

- Similarity Model for DEM Simulation of Fluidized Bed
  Kinnaki Washino, Chin-Hung Hsu, Toshihiko Kawaguchi and Yutaka Tsuji

TECHNICAL NOTES

- Program Optimization for Large-scale DEM and its Effects of Processor and Compiler on the Calculation Speed
  Hiroshi Mio, Atsuko Shimosaka, Yoshiyuki Shirakawa and Jusuke Hidaka

No.4

ORIGINAL PAPERS

- Optical Properties of Film Coated with Localized Fine Particles and Agglomerative Structure in Film
  Hiroshi Yoshiha, Yoshiyuki Komoda, Hironobu Imakoma and Hiromoto Usui

- Effect of Slurry Preparation Conditions of Soft Ferrite Powder on the Properties of Its Sintered Body
  Masayasu Uemura, Kazuyoshi Sato, Hiroyo Abe, Makio Naito, Kiyoshi Nogi and Keizo Uematsu

- Analysis of Up-flow Filtration Performance Using Floatable Fibrous Media by Deep Bed Filtration Model
  Kazuho Nakamura, Makoto Kawasaki, Naoko Sakuda and Kanji Matsumoto

- Proposal of Ergun’s Equation Modified with Ratio of Straight Length to Particle Perimeter and Pipe Wall Effect
  Kenji Kofu, Mitsuaki Ochi and Masahiro Takei

REVIEW

- Thread Forming Property of Slurries and Agglomerated Structure of Nanoparticles
  Masafumi Arakawa

REVIEW : FRONTIER RESEARCH SERIES

- MRI Measurement of Granular Flows and Fluid-Particle Flows
  Toshihiro Kawaguchi

LECTURE SERIES

- Powder Nanotechnology
  3. Measurement and Analysis for Nanoparticles

DOCTORAL THESIS INTRODUCTION

- Constrained Sintering of the Glass Alumina Substrate with Inner Alumina Particle Layer
  Shuya Nakao

No.5

ORIGINAL PAPERS

- Separation Efficiency by Selective Wet Agglomeration at High Solid Concentrations
  Hitoshi Takase and Yasuo Katata

- Centrifugal Classification of Particles and Analysis of the Fluid Dynamics
  Tetsuya Yamamoto, Tomohiko Shinya, Kunihiro Fukui and Hideto Yoshida

- Adaptability of Central Calculation Method of Pressure Drop for Bed Length
  Kenji Kofu, Mitsuaki Ochi and Masahiro Takei

TECHNICAL NOTE

- A Countermeasure for Chemical Contamination in Clean Rooms
  Isao Tanaka

REVIEW

- Evaluation of Stability of Solid Pharmaceutical Drugs : from the Viewpoint of Photostability
  Yoshihisa Matsuda

LECTURE SERIES

- Powder Nanotechnology
  3. Measurement and Analysis for Nanoparticles
## Introduction of Scanning Probe Microscopy (SPM)
- Recent Applications and Interaction Measurement

Kenji Komori ................................................................. 377

### DOCTORAL THESIS INTRODUCTION

- Development of Amphiphilic γ-PGA Based Antigen Delivery Carrier for Cancer Immunotherapy
  Tomoaki Yoshikawa ......................................................... 386

---

**Special Issue of 42nd Particle Technology Meeting**

New Development in Processing and Functional Design of Particles with Building-up Process

" — Evaluation of Nucleation, Growth and Crystallization, and Scale-up Technology — "

### REVIEW

- Design Method of Crystallizer for Functional Fine Particle
  Takahiro Nishita and Yasuo Yamazaki .................................. 420

### ORIGINAL PAPERS

- Morphology of Particles Precipitated by Liquid-liquid Interfacial Crystallization and Mutual Diffusion of NaCl Aqueous Solution and Organic Liquid at the Interface
  Kazumori Kadota, Ikumi Matsumoto, Yoshiyuki Shirakawa, Atsuko Shimosaka and Jusuke Hidaka ...................... 427

- Crystal Growth Mechanism of Layered Octosilicate Illite in the Hydrothermal Synthesis
  Tomohiro Iwasaki, Kenji Murai and Satoru Watano .................. 434

- Shape and Size Control of Barium Chromate Nanoparticles Using Reverse Micelle
  Toshiyuki Nomura, Toshihiro Morii, Hiroaki Arima and Yasuhiro Konishi ........................................... 441

- Fabrication and Particle Size Control of Oxide Nanoparticles by Gas Phase Reaction Assisted with DC Plasma
  Akira Watanabe, Motoharu Fuji, Masayoshi Kawahara, Takehisa Fukui and Kiyoshi Nogii .......................... 447

### SHORT COMMUNICATIONS

- New Particle Design and Its Preparation of NFκB Decoy Oligodeoxynucleotide (NDON) Loaded PLGA Nanospheres for Gene Delivery
  Hiroyuki Tsujimoto, Yusuke Tsukada, Kaori Hara and Yoshiaki Kawashima ........................................... 453

- Use of Spouted Bed Type Binderless Granulation to Design PLGA Nano-composite Granules for Dry Powder Inhalation
  Hiroyuki Tsujimoto, Kaori Hara, Yusuke Tsukada Yoshiaki Kawashima and Shigenobu Hatano .................. 459

### DOCTORAL THESIS INTRODUCTION

- Dechlorination of Polyvinylechloride with Mechanochemical Treatment
  Tsuyoshi Inoue ........................................................... 465

---

**No.6**

**DOCTORAL THESIS INTRODUCTION**

- Precise Quantitative Analysis of Indomethacin Polymorphs Employing A Novel Sample Preparation Method
  Takehiro Okumura ......................................................... 554

---

**No.7**

**DOCTORAL THESIS INTRODUCTION**

- Precise Quantitative Analysis of Indomethacin Polymorphs Employing A Novel Sample Preparation Method
  Takehiro Okumura ......................................................... 554

---

**No.8**

**DOCTORAL THESIS INTRODUCTION**

- Precise Quantitative Analysis of Indomethacin Polymorphs Employing A Novel Sample Preparation Method
  Takehiro Okumura ......................................................... 554
ORIGINAL PAPERS
- Effect of Molecular Weights of Polymers on Rheological Behavior of Alumina Suspension and Properties of Alumina Green Sheets
  Kouichi Nagata and Hiroyuki Takase ...................................................... 574
- Uniform Coloring of Silica Glass by Dispersion of Submicron Droplets Dissolving Organic Dye
  Yoshihiro Kamimura and Ken-ichi Kurumada ........................................ 581

REVIEW
- Risk Assessment of Fine Particles and Nanoparticles
  Toshihiko Myojo, Akira Ogami, Takako Oyabu, Yasuo Morimoto, Masami Hirohashi, Masahiro Murakami, Kenichiro Nishi, Chikara Kadoya and Isamu Tanaka ...................................................... 587

REVIEW : FRONTIER RESEARCH SERIES
- Modeling of Aerosol Dynamics by Discrete-Sectional Model
  Toshiyuki Fujimoto ................................................................. 593

LECTURE SERIES
- Powder Nanotechnology
  3. Measurement and Analysis for Nanoparticles
  3.5 Measurement of Zeta Potential and Size Distribution of the Highly Concentrated Colloidal Particles by Electrokinetic Sonic Amplitude Method
  Toshinobu Sueyoshi and Kazuyuki Nakai ........................................ 598

DOCTORAL THESIS INTRODUCTION
- Evaluation of Pulverized Coal Combustion Characteristics for Several Kinds of Fuel and Development of Advanced Combustion Technology for Sub-bituminous Coal
  Michitaka Ikeda ................................................................. 604

No.9
Special Issue of 44th Symposium on Powder Science and Technology

ORIGINAL PAPERS
- Chemical Looping Gasification and Combustion Processes for CO2 Sequestration
  Hiroyuki Hatano, Yoshizo Suzuki, Koichi Matsuoka and Shinji Fujimoto ...................................................... 638
- Electrostatic Separation of a Binary Solid Mixture Using a Rotating Conical Vessel
  Yumi Honda, Kenichi Yamamoto, Hiroko Ogura, Hiroyuki Sasakawa and Masunori Sugimoto ...................................................... 645
- Development and Application of Single-wire-sliding-type Friction Tester for Cosmetics
  Eiichiro Misaki, Takanori Igarashi, Yoshimune Nonomura, Akio Kashimoto and Jun Oshitani ...................................................... 653
- Preparation of Thermo-sensitive Nano Capsules by Using AOT Reverse Micellar Method
  Shiro Kiyoyama, Kosuke Minamihata, Koichiro Shimomori, Hidekazu Yoshizawa, Masahiro Yoshida and Yasuo Hatate ...................................................... 658
- Development of Visible Light Sensitive Titanium Dioxide Loaded with Fe2O3 Nanoparticles and Evaluation of their Photocatalytic Activities
  Kazumoto Nishijima and Teruhisa Ohno ...................................................... 664
- Development of a Novel Mechanoluminescent Material with Water-resistance
  Lin Zhang, Hiroshi Yamada, Yusuke Imai, Nao Terasaki, Yoshio Adachi, Keiko Nishikubo and Chao-Nan Xu ...................................................... 673

REVIEW
- Synthesis and Self-assembly of Particles
  Mikio Konno, Daisuke Nagao and Yoshihisa Kobayashi ...................................................... 680

DOCTORAL THESIS INTRODUCTIONS
- Control and Characterization of Nanoparticle Dispersability in Aqueous and Non-aqueous Slurries
  Chika Takai ................................................................. 687
- Formation Mechanism and Morphology of Particles Precipitated from Solutions
  Kazunori Kadota ................................................................. 688

No.10

ORIGINAL PAPERS
- Thin Electrode Film Formation on Large Size Plasma Display Panels Using Photosensitive Silver Paste
  Kazutaka Nakayama, Shintaro Senda, Yoshitomo Hayashi and Noritaka Iida ...................................................... 710
- Fabrication of Microporous Glass Powder by Thermal Decomposition of Organic-inorganic Hybrid Glass
  Kengo Miyoshi, Ken-ichi Kurumada, Hayato Sobue, Yoshihiro Kamimura, Hisashige Kanbara, Hidekuni Ban-no and Masahiko Hiro ...................................................... 716
- Proposal on Prediction Equations of Particle Velocity and Pressure Drop Considered the Flow Pattern on Granular Particles Plug Transportation in Vertical Pipe
  Kenji Kofu, Mitsuaki Ochi and Masahiro Takei ...................................................... 723
**REVIEW**
- Yielding Characteristics of Powder Bed
  Mitsuaki Hirota ................................................................. 732

**REVIEW : FRONTIER RESEARCH SERIES**
- Calcium Oxide as a Solid Base Catalyst for Ecofriendly Production of Biodiesel……Masato Kouzu ............. 742

**LECTURE SERIES**
- Powder Nanotechnology
  3. Measurement and Analysis for Nanoparticles
  3.6 Size-measurement and Characterization of Nanoparticles Using Electrostatic Force
  Takaaki Orii, Masashi Imanaka, Junsuke Yabumoto and Kazuo Takeuchi ......................... 748

**DOCTORAL THESIS INTRODUCTION**
- Development of a Bead Mill Using Fine Beads for the Dispersion Nanooarticles
  Mitsugi Inkyo ........................................................................ 759

---

**No.11**

**ORIGINAL PAPERS**
- Effect of Adding Methods of Neutralizer on Rheological Behavior of Alumina Water-base Suspension and Properties of Green Sheets Using Acrylic Polymer
  Kouichi Nagata ........................................................................ 784
- Effect of Pipe Diameter Ratio on Pneumatic Conveying Characteristics of Suction Nozzle with Injection Pipe
  Minoru Fukuhara, Tomohiro Omure, Akihiro Ikeguchi, Hiroshi Katanoda, Naoko Ino and Yasuyuki Shii .... 790
- Preparation of Aluminum Nitride Ceramics by Aqueous Slip-casting
  Hisanori Yokoyama, Yoshiihiro Todaka, Yasushi Imoto, Hiroya Abe, Makio Naito and Koichi Kikuta ........ 798

**REVIEW**
- Particle Size Distribution Measurement Methods by Use of Classification Effect During Anisokinetic Sampling
  Hirofumi Tsuji, Hisao Makino and Hitode Yoshida ................................................................. 806

---

**LECTURE SERIES**
- Powder Nanotechnology
  3. Measurement and Analysis for Nanoparticles
  3.7 The Measurement and the Analysis of Nano-particles by Means of Electron Beam
  Tetsuo Oikawa ........................................................................ 813

**DOCTORAL THESIS INTRODUCTIONS**
- Study on Material Particle Size for Oral Solid Dosages and Pharmaceutical Properties
  Hironobu Kato ......................................................................... 823
- Preformulation Study on the Development of Effective Screening Method of Crystal Form of Tamoxifen and Their Solid-state Characterization
  Takashi Kojima ....................................................................... 824

---

**No.12**

**ORIGINAL PAPERS**
- Development of an Exponentail Sampling Correlator with Lagged Fibonacci Series for Polydisperse Nanoparticles
  Tetsuji Yamaguchi, Shigeyuki Kawarabayashi and Kikuo Okuyama ........................................ 846
- The Effects of Stress Ratio on Estimated Results of Powder Pressure
  Kazuhiko Takenaka, Kenji Imura, Michitaka Suzuki and Mitsuaki Hirota .............................. 852
- Experimental and Computational Study of Classification of Particles by Improved Centrifugal Separator
  Tetsuya Yamamoto, Toshike Kotani, Kunihiro Fukui and Hitode Yoshida .............................. 861

Chemical Reaction Engineering

- Phenol Decomposition by Visible Light Catalysis with Fullerene
  Motoko Narita, Fumitaka Amano, Yumiko Kadoishi and Hideo Nishiumi

Biochemical, Food and Medical Engineering

- Development of an Algorithm to Extract Specific Waveform Image Pattern for Diagnosis of Nail Apparatus Mela-noma
  Masahiro Nakatochi, Hiroshi Koga, Toshiaki Saida, Takeshi Kobayashi and Hiroyuki Honda

Materials Engineering and Interfacial Phenomena

- Effect of chelating agents on reactive crystallization of calcium phosphate in whey
  Hideki Tsuge and Yuri Koyama
- Measurement of Drying Rate of Water-Based Coat by Temperature Change Method
  Hironobu Imakoma, Shingo Nagaoka and Teiji Takigawa

Energy

- Hydrogenation of Naphthalene and Tetralin in the Presence of CO over Various Supported Metal Catalysts
  Takehiko Suzuki, Hiroshi Sekine, Masaki Ohshima, Hideki Kurokawa and Hiroshi Miura
- Inlet Configuration of a Recovery System for Methane Hydrate using Gas Lift
  Yosuke Matsukuma, Jun Morinaga, Yuki Nishiumi, Gen Inoue and Masaki Minemoto
- Degradation by Water Vapor of MnNi5-Based Hydrogen-Absorbing Alloys with Different Compositions
  Yutaka Sangu, Toshiyuki Hirosawa, Satoshi Kikuchi, Yohsuke Matsushita, Yoshih Morozumi, Hideyuki Aoki, Takatoshi Miura and Yoshiaki Kawakami

Environment

- Behavior of Dioxins in Remediation of Dioxin-contaminated Soil by Thermal Desorption
  Takeshi Sato, Tomohiro Todoroki, Katsuhiro Nakajoh, Takeshi Gotanda and Tomoko Takeyama
- Effect of Sodium Carbonate on the Reduction of Lead Sulfate by Solid Carbon
  Takeshi Hatakeyama, Katsuyasu Sugawara, Risheiro Nonaka and Satoru Takayanagi

No.1

Feature Articles
- Application of Aerosol Technology to Industrial Products -
  ● Introduction to the Feature Articles
    S. Sato ................................................................. 4
  ● Development of Home Appliances Using Electrostatic Atomization
    T. Yamauchi, H. Suda and Y. Matsui ................................. 5
  ● Cryogenic Aerosol Cleaning Technology for Advanced Semiconductor Manufacturing Process
    K. Itoi ................................................................. 11
  ● Microwave Capacitor Film Using Aerosol Deposition and Its Application
    Y. Imanaka and J. Akedo ............................................ 14
  ● Electro-Optic Transparent Films Prepared by Aerosol Deposition
    M. Nakada ............................................................. 20
  ● Gas Deposition Apparatus Using Nanoparticles as Coating and Those Applications
    E. Fuchita ............................................................. 26

Research Paper
  ● Influence of Background Concentrations on SPM and CO Concentrations near Emission Sources
    M. Onishi and S. Sakai ............................................. 35

Technical Paper
  ● A Moment Method for Evaporation in the Free Molecular Regime: Sensitivity to Time-Integration Scheme
    M. Yamamoto ......................................................... 41
  ● Development of a Large Annular-Type DMA and Evaluation of Its Classification Property
    H. Koyama, S. Ikawa, T. Myojo and K. Okuyama .................. 48

No.2

Feature Articles
- Planetary Aerosol -
  ● Introduction to the Feature Articles
    T. Nakakushi ......................................................... 86
  ● Martian Dust and Dust Storms
    M. Odaka ............................................................. 87
  ● Cloud System of Venus
    T. Imamura .......................................................... 95
  ● Moist Convection in Jupiter's Atmosphere
    K. Sugiyama, M. Odaka, K. Nakajima and Y. Hayashi ............... 101
  ● Planetary Aerosol Laboratory Experiments for Science Education: Is the Sunset on Mars Really Blue?
  ● Organic Aerosol in Titan and Its Relevance to the Study of Origins of Life
    T. Taniuchi and K. Kobayashi ..................................... 113
  ● Current Status of the Research for Interplanetary Dust Particles and Its Future
    T. Mukai ............................................................ 119

Research Paper
  ● Measurement and Source Identification of Trace Metals in PM2.5 and PM1 Collected by Multi-Nozzle Cascade Impactor in Tokyo Metropolitan Area, Japan
    T. Okuda, M. Katsumo, S. Tanaka, Y. Kondo, N. Takegawa and Y. Komazaki ............................................. 126
  ● Particulate Polycyclic Aromatic Hydrocarbons in the Urban Atmosphere of Kumamoto, Japan under Mild Weather
    H. Ji, D. Zhang, R. Shinohara, W. Fujiie, M. Koga, Z. Shi and K. Nomiyama ........................................... 135

No.3

Feature Articles
- Heterogeneous Reactions Relevant to Aerosol -
  ● Introduction to the Feature Articles
Formation of New Particles in the Atmosphere: Current Knowledge on Nucleation and Initial Condensational Growth  
M. Mochida  
---  
Theoretical Analysis of Mass Transfer Kinetics at Gas-Aerosol Interfaces  
A. Morita  
---  
Heterogeneous Reactions on Solid Aerosol Surfaces in the Atmosphere  
A. Susa  
---  
Modeling of the Heterogeneous Reaction Processes on the Polar Stratospheric Clouds in Chemical Transport Models and the Effects on the Arctic Ozone Layer through Bromine Species  
H. Akiyoshi  
---  
● (Review Paper) Importance of Heterogeneous Reactions from the Viewpoint of Field Observation of Atmospheric Aerosols: Contribution to Aerosol Constituents and Chemical/Physical Properties  
K. Hara  
---  
Study on Atmospheric Diffusion of Bioaerosols in a KOSA Source Region  
F. Kobayashi, M. Kakikawa, M. Yamada, B. Chen, G.-Y. Shi and Y. Iwasaka  
---  
Degradation Characteristics of PAHs in Ambient Aerosol by Soft X-ray Irradiation  
Y. Bai, M. Furuchichi, Y. Otani, M. Hata and M. Aizawa  
---  
Influences of Biometrical Parameters on Aerosol Deposition in the ICRP 66 Human Respiratory Tract Model: Japanese and Caucasians  
Y. Yamada, K. Fukutsu, O. Kurihara, T. Momose, K. Miyabe and M. Akashi  
---  
CFD Simulation of Flow Patterns and Pulverized Coal Particle Motions in a Variable Load Burner  
M. Kimoto, H. Shirai, H. Yamamoto and Y. Otani  
---  
Assuring Accuracy in Aerosol Measurements  
---  
Calibration, Validation, Reference Materials, and Standards---  
Introduction to the Feature Articles  
H. Sakurai  
---  
Standard Reference Materials of Nanoparticle with Diameter of a Few Nanometers  
M. Imanaka and K. Takeuchi  
---  
Manufacture of Polystyrene Standard Particles and Their Applications  
M. Hikata, M. Sakuma and Y. Fukai  
---  
Reference Filter for Measurements of Elemental Carbon (EC) and Organic Carbon (OC) in Aerosol Particles  
H. H. Lee, K. M. Yun and K. Okuyama  
---  
Research and Development of International Standard Measurement and Analysis Method for Emission Behavior of Suspended Particulate Matter from Stationary Sources  
H. Kamiya  
---  
Research Paper  
Construction of a Test and Calibration Station for the Aerosol Charge Neutralizer and an Example of Evaluation of an Americium Neutralizer  
Y. Sato, H. Sakurai and K. Ehara  
---  
Calibration of the Detection Efficiency of the Condensation Particle Counter (CPC) and Evaluation of the Classification Characteristics of the Differential Mobility Analyzer (DMA)  
H. Sakurai, Y. Sato and K. Ehara  
---  
Light Absorption Characteristics of Atmospheric Aerosols Observed at the Summit of Mt. Fuji in Early Summer  
N. Kaneyasu and Y. Igarashi  
---  
Measurement of Evaporation Property of Cigarette Main-Stream Smoke Using Denuder Tube Method  
K. Katayama, K. Miura, M. Shimada and K. Okuyama  
---  
The Rate of Vapor Condensation on Clusters in Ion-Induced Water Cluster Formation  
Y. Okada, Y. Hara and K. Kawabata  
---
